

- **Op. Status Selection (Operational Status Selection):** Identifies the Operational Status selections that were used to execute the report.
- **Tech. Status Selection (Technical Status Selection):** Identifies the Technical Status selections that were used to execute the report.
- **UIC & Unit Description:** Identifies the Unit Identification Code (UIC) and the associated Unit text description that was used to execute the report.
- **Date & Time Stamp:** Identifies the date and time the report was executed

Op. Status Selection: NMCS, NMCM
Tech. Status Selection: X

- **Model:** Identifies the model number of the deadlined equipment.
- **Admin Number (Administrative Number):** Identifies the administrative number assigned to the deadlined equipment.
- **Serial Num (Serial Number):** Identifies the serial number of the deadlined equipment.
- **OpSt (Operational Status):** Identifies the Operational Status of the deadlined equipment, Non-Mission Capable Maintenance (NMCM) or Non-Mission Capable Supply (NMCS).
- **Eq Description (Equipment Description):** Identifies the equipment using a text description.
- **ERC (Equipment Readiness Code):** Identifies the Equipment Readiness Code (ERC) of the deadlined equipment.
- **DL St Date/Time (Deadline Status Date/Time):** Identifies the date and time the equipment was deadlined.
- **Days DL (Days Deadlined):** Identifies the number of days the equipment has been deadlined.

- **UIC (Unit Identification Code):** Identifies the Unit Identification Code (UIC).
- **UIC Description:** Identifies the Unit, using a text description that is associated with the UIC.
- **Number DL Eq (Number of Deadlined Equipment):** Identifies the total number equipment that is deadlined for the Unit.

Op.Status Selection: NMCS, NMCM

- **Stat:** Identifies the Technical Status of the deadlined equipment.
- **Order Num (Order Number):** Identifies the work order or notification number associated with the deadlined equipment.
- **Notification numbers begin with an N, followed by a dash, and the notification number (N - XXXXXXXXXXXX).**
- **Description:** Identifies the purpose of the work order.
- **Mn WC (Main Work Center):** Identifies the work center responsible for performing the maintenance work in the work order.
- **SC (System Condition):** Identifies the system condition code of the work order, such as A (Awaiting Inspection), B (In Shop) etc. Refer to the DA Pamphlet 750-8, Table B-20 and B-21 for additional guidance.
- **SC Date (System Condition Date):** Identifies the date the work order system condition (SC) was applied.
- **Material:** Identifies the material number or NIIN of the work order component requested.
- **Description:** Identifies the material using a text description.

- **QtyRq (Quantity Requested):** Identifies the quantity of the material or NIIN requested.
- **Qtyls (Quantity Issued):** Identifies the quantity of the material or NIIN issued.
- **QtyOH (Quantity On-Hand):** Identifies the quantity of the material or NIIN on-hand in shop stock.
- **NxLvl (Next Level):** Identifies the quantity of the material or NIIN on-hand at the Supply Support Activity (SSA).
- **SOS (Source of Supply):** Identifies the source of supply (vendor) used to fulfill the work order request.
- **Ref Doc (Reference Document):** Identifies the reference document number used to fulfill the work order request, such as a purchase order, a delivery document, etc. If a purchase requisition (PR) has been rejected for conversion into a purchase order (PO), PR REJECTED displays in this field.
- **St (Status):** Identifies the status of the request used to fulfill the work order.
- **Pr (Priority):** Identifies the priority of the work order request.
- **ESD (Estimated Shipment Date):** Identifies the estimated shipment date of the material associated with the work order.
