

TXARNG Drivers Licensing and Dispatching SOP

01 April 2025

Texas Military Department
Texas Army National Guard (TXARNG)
P.O Box 5218
Austin, TX 78763-5218
01 April 2025

FY2025 TXARNG Standard Operating Procedures

TXARNG Driver's Licensing and Dispatching Standard Operating Procedures*
By Order of the Commander, Texas Army National Guard (TXARNG)

Official:
Karim A. Brandford
COL, IN, TXARNG
Director, Operations & Training (J-3)

Summary. This regulation establishes standards, policies and procedures for the selection, training, and licensing of personnel to become Army motor vehicle drivers and operators of powered or self-propelled equipment. When used with the TXARNG Drivers Licensing Guide and AR 600-55, it constitutes the Licensing Program for the TXARNG.

Commanders Review: Licensing Steps 1-13 Appointment Orders Unit Drivers Training Checklist Dispatching Checklist

Applicability. This regulation applies to all units and activities of the TXARNG. Individuals operating a vehicle and mechanical equipment for the TXARNG must possess a valid Operators Permit Identification (ARMY STANDARD PERMIT) and a valid, State-Issued Driver's License.

Supplementation. Supplementation of this SOP is prohibited.

Suggested Improvements. The proponent agency of this SOP is the J3 Director of Operations and Training, TXARNG. Users are invited to send comments and suggested improvements on DA FORM 2028, directly to NGTX-JOZ, P.O. Box 5218, Austin, Texas 78763-5218 or to the State Master Driver at jaime.esparza2.mil@army.mil

DISTRIBUTION: A

SUMMARY OF CHANGES

This revision, dated 28 September 2023, lists changes to the Texas Army National Guard Drivers Licensing and Dispatching SOP

Added Truck Master Role for motor transportation units. Chapter 1

Added Load securement training for applicable platforms and units per TC 21-305-20 Chapter 21. Chapter 1

Added DTMS update to soldiers training record once issued army standard permit. Chapter 5

Added requirement for units to maintain copy and provide SM with original drivers training packet upon unit transfer, promotion, PCS, IST for gaining unit. Chapter 5

Added annual check ride requirement for forklift and construction equipment per AR 600-55. Chapter 7

Added DTMS Updates to checklist in Appendix B.

Added Cell phone use guidelines for TC. Appendix F

Added Ammunition/Hazmat training certificates to drivers training packet and checklist. Appendix G

Removed TAB G licensing guide addressing Accident-Avoidance course no longer required per HQDA.

Updated appendices and licensing guide with applicable example forms.

DA Form 5988-E, DA Form 2404, SF 91, DD 518, DA 6125R, DA 348.

Added pages in general (due to more informational text), page breaks, and page numbers accordingly.

CONTENTS	Para	Page
CHAPTER 1 General		
Purpose	1-1	1
Applicability	1-2	1
References	1-3	1
Delegation of Authority	1-4	1
Training Course Program of Instruction	1-5	1

CHAPTER 1 GENERAL

1-1 PURPOSE

This publication establishes standards, policies, and procedures for the selection, training, and licensing of operators of Army, government-owned, or government-leased vehicles and equipment. When used with the Texas Army National Guard (TXARNG) Drivers Licensing Guide and AR 600-55, it constitutes the licensing program for the TXARNG.

1-2 APPLICABILITY

This Standard Operating Procedure (SOP) applies to all units and activities of the TXARNG. Individuals operating a vehicle or mechanical equipment for the TXARNG must possess a valid Operators Permit OF 346, or DA Form 5984-E (ARMY STANDARD PERMIT), and a valid State-issued driver's license.

1-3 REFERENCES

This TXARNG standard operating procedure supplements AR 600-55 dated 17 Sep 2019. Required and related publications are listed in Appendix A.

1-4 DELEGATION OF AUTHORITY

The TXARNG Drivers Training Program is a battalion level or higher program. Commanders are authorized to delegate subordinate Commanders (unit/ company/ battery/ troop detachment level) and support facilities the authority to train, test, and license vehicle and equipment operators at any TXARNG facility IAW this SOP and AR 600-55.

1-5. TRAINING COURSE PROGRAM OF INSTRUCTION (POI)

Licensed Instructors will gather and create classroom instructions, training content, and testing material based on the POI listed in AR 600-55 Appendix E, Section E-3. The contents therein shall cover Units A-W of Phases I, II, and III and will be approved by the battalion Master Driver prior to beginning drivers training. Reference above mentioned regulation or Ch. 4-1 Operator Training of this SOP for the complete list of all units and training phases.

Note: For all intents and purposes, the term "unit" in this publication is used synonymously with company, battery, troop, or detachment.

CHAPTER 2 RESPONSIBILITIES

2-1 PROGRAM MANAGEMENT (Key Personnel)

It is the responsibility of each brigade, battalion, and unit to fully staff positions within their driver's training/licensing program with qualified non-commissioned officers. These personnel will be appointed in writing and their appointment letters will be filed at their respective S3 with the Master Driver.

The following are the basis for implementation of the TXARNG Driver's Licensing Program. It emphasizes the requirements of each position IAW AR 600-55, Ch. 1-4 and Appendix F, Evaluation for Selecting Master Driver, License Instructor, and License Examiners. The driver's training personnel (with duty requirements) are:

- a. **Brigade Master Driver Manager.** The Master Driver manager is an NCO in the rank of SFC (or comparable civilian) that is the primary advisor to the brigade commander or civilian directors (GS – 15) for all facets of operator training. The master driver manager is the most experienced individual in the organization when it comes to operator training and licensing and is responsible for overseeing, validating, and inspecting the licensing programs of subordinate organizations. Master Driver Managers at this level must ensure their BN Master Drivers Managers have validated subordinate units' training curriculum, risk assessment, and schedule which must meet all POI requirements listed in AR 600-55, Appendix E, Section E-3 PRIOR to approving any drivers training.
- b. Qualifications: The Master Driver Manager must—
 - (1) Be a graduate of the Master Driver Trainer Course provided by the U.S Army Transportation School or TRADOC certified mobile training teams.
 - (2) Successfully complete the License Instructor and Examiner distance learning course on ATRRS accessible via Army Learning Management System.
 - (3) Be certified by the commander (or director) and appointed in writing.
 - (4) Be assigned to a brigade staff in the Operations S3 section (directors of civilian organizations will determine best individual to fill this role).

- (5) Be a licensed operator. However, the Master Driver Manager is a program manager for subordinate organizations and does not necessarily need to be licensed on all equipment in the organization.
- c. **Battalion Master Driver.** The Master Driver is an NCO in the rank of SSG or above (or comparable civilian). The Master Driver is the primary advisor to the battalion commander or civilian division chief (GS – 14 and above). The master driver is responsible for licensing and training program execution. Duties include the facilitation of training by ensuring resources are coordinated, such as: classrooms, driving facilities, road courses, and simulators (where applicable), and the scheduling of required license instructors and license examiners to assist with Phase I training execution (see para 4 – 3). The master driver provides quality assurance for Phase II and Phase III operator training programs and ensures all training and licensing is accomplished in accordance with this regulation. Battalion Master Driver Managers must validate subordinate units' training curriculum, risk assessment, and schedule ensuring that they meet all POI requirements listed in AR 600-55, Appendix E, Section E-3 before approving any BN drivers training.
- d. The Master Driver must—
 - (1) Be a graduate of the Master Driver Trainer Course provided by the U.S Army Transportation School or TRADOC certified mobile training teams.
 - (2) Successfully complete the License Instructor and Examiner distance learning course on ATRRS accessible via Army Learning Management System.
 - (3) Be certified by the commander (or director) and appointed in writing.
 - (4) Be assigned to a battalion staff in the Operations S3 section (directors of civilian organizations will determine best individual to fill this role).
 - (5) Be a licensed operator. However, the Master Driver is a program manager for subordinate organizations and does not necessarily need to be licensed on all equipment in the organization.
 - (6) Coach, train, and mentor all prospective license instructors and license examiners on operator selection, training, and licensing procedures.

- e. **Truckmaster.** (Specific to motor transport units) MTOE position located in operations section. The truckmaster supervises vehicle operations, enforces safety rules, and reports evidence of vehicle neglect, abuse, or operator carelessness. The truckmaster maintains driver qualification records on unit personnel, ensures each Soldier is properly trained according to unit policy and standards before licensing. For this reason, the truckmaster is normally assigned the additional duty of the company master driver. The truckmaster records safe driving mileage accumulated by unit drivers and advises the commander of personnel eligible for safe driving awards. The truckmaster is required to be licensed on all vehicles assigned to the company and conducts road testing and qualifications.
- f. **License Instructor.** The license instructor (LI) is a vehicle or equipment subject matter expert who has been selected and appointed by the company commander or civilian branch chief to train prospective operators. License instructors are responsible for conducting Phase II equipment training, to include the classroom equipment introduction, and all hands-on training (see para 4–3a). Selecting the best license instructors available to conduct hands-on performance-oriented training is essential. See Ch. 3, Para 3-1 in this SOP for an outline to assist in selecting license instructors and license examiners. License Instructors must first submit their training curriculum, risk assessment, and schedule to the BN Master Driver Manager for approval. It must meet all POI requirements before beginning any unit drivers training.
- g. License instructors must—
 - (1) Be interviewed by the commander prior to being appointed in writing IOT validate their experiences and abilities to train, instruct, or examine on an authorized type of vehicle or equipment.
 - (2) Successfully complete the License Instructor and Examiner distance learning course on ATRRS accessible via Army Learning Management System.
 - (3) Be a non-commissioned officer (or comparable civilian). Exceptions to this requirement apply when an MOS trained enlisted Soldier is a subject matter expert on a piece of equipment. For instance, an E – 4/ SPC 91C Utilities Equipment Repairer, may be the best qualified individual to train operators on power-generation equipment.
 - (4) Be licensed to operate the vehicle or equipment.

- (5) Have technical knowledge and experience as outlined in Appendix F.
 - (6) Be assigned to the organization that is conducting the training. Exceptions to this requirement only apply when an organization lacks subject matter expertise or during new equipment training (NET) and new equipment fielding.
- h. **License Examiner.** The license examiner is a vehicle or equipment subject matter expert who has been selected and appointed by the company commander or civilian branch chief to conduct examinations on prospective operators. License Examiners are required to administer the Phase I: Initial Operator Training exam, Phase II: Equipment Training exam, and the Phase III: Training Validation, PMCS Hands on Test, Vehicle Control Test, Performance Road Test exam.
- i. License examiners must—
 - (1) Be appointed in writing as a license examiner for specific types of vehicles or equipment.
 - (2) Be a non-commissioned officer (or comparable civilian).
 - (3) Have technical knowledge and experience as outlined in Appendix F.
 - (4) Successfully complete the License Instructor and Examiner distance learning ATRRS course on ALMS.
 - (5) During the commander's interview process, LE will verify previous training qualifications (if any) for newly assigned Soldiers along with the commander's approval. Refer to Training Verification Form for Previous Training in Appendix H of this SOP.

Note: In the absence of a License Examiner, the BN Master Driver will step into the position of the License Examiner. The practice of having different personnel administer examinations and road tests is to ensure training is completed to standard without bias.

2-2 JOINT FORCES HEADQUARTERS (JFHQ)

The TXARNG J37 Training Branch is the proponent for the Texas Army National Guard Licensing Program, which includes issuing guidance, assisting commanders with training, testing, providing quality assurance, and quality control. The TXARNG J37 Training Branch will:

- a. Be responsible to maintain, update, and post to the J3/7 Lone Star Portal (eLSP) website, TXARNG Drivers Licensing and Dispatching SOP, AR 600-55, TXARNG Drivers Licensing Guide and any additional applicable forms and reference material.
- b. Conduct compliance evaluations on unit licensing programs in conjunction with the J4's Command Maintenance Discipline Program Evaluation and FMS/ UTES assistance visits.
- c. Maintain and publish a TXARNG Drivers Licensing Guide (See Appendix Q) to serve as "step by step" licensing tool.

2-3. SUPPORT ACTIVITIES

- a. Combined Support Maintenance Shops (CSMS), Maneuver Area Training Equipment Site (MATES), Field Maintenance Shops (FMS), and Unit Training Equipment Site (UTES) are all considered Surface Equipment Maintenance Facilities (SEMF).
- b. Select, train, and test personnel IAW this SOP and AR 600-55 to operate vehicles and equipment assigned or supported by the SEMF, which may not be assigned to the operator's military unit. The Facility Supervisor/commander will maintain a driver's record for military personnel assigned to them. This will ensure support activity soldiers are properly licensed to operate equipment assigned to the maintenance facility, without the burden of coordinating for a license through the unit of every assigned technician.
- c. Conduct quarterly assistance inspections to supported units using the checklist found in Appendix B, Driver's Training Evaluation Checklist. The intent of these visits is to provide the supported unit a quality control check on the effectiveness of their drivers training program and identify systemic issues requiring resolution at the State level.
- d. Assign one driver training subject matter expert (SME) to provide resource information to supported units and provide advice on their drivers training program. These personnel will be available on IDT weekend by request, to assist Commanders in their drivers training program.

- e. Communicate requirements, timelines, qualified platforms and all training conducted to organic unit commander and or master driver with relevant and applicable operator packet contents if necessary. This will prevent commanders being unaware of soldier operator status and vehicles specifically operated for technician duties.

2-4. COMMANDERS

- a. Implement and ensure compliance with AR 600-55, TXARNG Drivers Licensing and Dispatching SOP, and guidance provided in the TXARNG Drivers Licensing Guide.
- b. Units must ensure that Operator Permit Ledgers in GCSS-A (Transaction Code: **ZOPLR**) is updated monthly with accurate licensed operators' data with corresponding physical documentation to provide the most current information.
- c. Appoint a Master Driver and alternate (SSG or GS-7 and above) at Battalion level and assigned to the battalion staff in the operations/S3 section. These two individuals will oversee the Commander's licensing program while working closely with unit instructors/examiners and support activities. Each company will have trained License Instructors and Examiners assigned. Master Drivers may be appointed at the unit level only if geographically separated from higher-level command.
- d. Appoint a minimum of two License Instructors (primary & alternate) and two License Examiners (primary & alternate) at the unit level to conduct the Driver's training process. A minimum of two BN Master Drivers (primary/alternate) at the unit level to conduct the Driver's training process.
- e. Ensure training and licensing program is conducted IAW this SOP and AR 600-55, Appendix E, Section E-3, Program of Instruction. Driver's Training must STRICTLY include Units A through Unit W.
- f. Ensure all driver's training folders are verified by unit's authorized LI/LEs with current information biannually. See Appendix I for Operator's Training Packet Checklist
- g. License minimum enough individuals per the Tier requirements IAW 2-8 of this SOP
- h. Conduct the Commander's Interview using the interview format in Appendix C of this SOP (additional guidance can be found in AR 600-55, Appendix B. This may be delegated in writing to a SSG or GS-7 and above.

- i. Ensure operators' Technical Manuals (-10) are provided for all vehicles and equipment.
- j. Ensure all vehicle operators and assistant drivers are assigned to vehicles per MTOE.
- k. During the commander's interview process, the commander and LE will verify the Soldier's previous training qualifications (if any) for newly assigned service members. Thereby the commander is accepting the previous units' training as valid and completed towards the issuance of a military driver's license. Refer to Training Verification Form for Previous Training in this SOP.
- l. The issuing LICENSING authority is the unit or activity that has been granted authority in writing to test and qualify drivers and operators. The issuing official is the commanding officer or representative authorized in writing by the commanding officer. (Ref. AR 600-55, Ch 6-1 a-d) These individuals may be the unit's LI/LEs or battalion MDs.

2-5. SQUAD LEADER OR FIRST LINE LEADER/SUPERVISOR

- a. Ensure subordinates are licensed operators and are proficient in the use of assigned vehicles/equipment and load securement if applicable (i.e. trailers, palletized load systems, blocking and bracing loads, see TC 21-305.20 Chapter 21). Feedback from first line leaders to instructors/examiners is an integral part of improving a licensing program. (See AR 600-55, CH 1-4, para I, (1-7) for complete list).
- b. Confirm with LI/LE or Master Driver that drivers training records/files are checked biannually for accuracy and validity IAW Driver's License Training Folder Check Sheet.
- c. Maintain a current individual military license for all assigned equipment.
- d. Ensure all vehicle operators are assigned a vehicle and an assistant driver.

2-6. OPERATORS OF MOTOR VEHICLES/TRACKS

- a. Report unsafe operating conditions of vehicles, equipment, or load securement.
- b. Report all accidents to supervisor and to the motor pool from which the vehicle was dispatched.

- c. Comply with all municipal, State, and military motor vehicle and/or equipment regulations.
- d. IAW Memorandum from Secretary of the Army Washington dated 18 Apr 2018 Accident-Avoidance Course (AAC) is NO longer required by HQDA.
- e. Possess an “ARMY STANDARD” operator permit for the vehicle/equipment being operated and possess a valid State-issued Driver’s License.
- f. Only drive vehicles with a licensed assistant driver.

2-7. SENIOR OCCUPANT

The senior occupant of an Army Military Vehicle (AMV) or Army Civilian Vehicle (ACV) is the senior ranking individual present or, in the case of a combat vehicle, the vehicle commander (VC), and is responsible for the overall safety of the occupants. The senior occupant will:

- a. Confirm that the driver is licensed on the vehicle to be operated and dispatched.
- b. Confirm that proper PMCS is/ has been conducted and documented.
- c. Ensure that the seating capacity is not exceeded and restraint systems, when provided, are worn when the vehicle is in motion. All other Personal Protective Equipment (PPE) associated with the vehicle will be used as well, i.e., ACH and hearing protection, etc.
- d. Ensure the driver is rested and not emotionally or physically impaired from safely operating the vehicle IAW AR 385-10, CH 11-2, c, (4).
- e. Ensure that the requirements of AR 600-55 are met.

2-8. MINIMUM LICENSED DRIVERS’ REQUIREMENTS

Commands and representatives will follow the Tiered Minimum Licensed Drivers Requirement Table (reference Figure 1 below). This outlines the minimum number of licensed drivers required for each unit and depicts how they are evaluated. The required percentage of licensed drivers are calculated based on the density of the motorized rolling stock assigned to the unit’s Military Table of Organizational Equipment (MTOE).

Units will:

- a. Identify their appropriate Tier based on the number of their MTOE's motorized rolling stock. For example, if the unit in question has 22 vehicles, it would be categorized under Tier III requiring 50% of their authorized strength to possess a standard Army driver's license.

Tiers	MTOE Motorized Rolling Stock	Required of Authorized Strength
I	1-5	5%
II	6-10	20%
III	11-30	50%
IV	31+	70%
Tier levels based on number of MTOE motorized rolling stock.		

Figure 2-1: Tiered Minimum Licensed Drivers Requirements

- (1) Baseline minimum will be 2 licensed personnel per motorized rolling stock.
- a. Calculate their minimum number of licensed drivers using the following formula:

$$\text{Authorized Strength} \times \text{Tier Level \%} = \text{Required Min Licensed Drivers}$$

- b. Ensure adherence to the prescribed requirements and maintain compliance. Unit status will be reported "Green" if they meet or exceed their directed minimum number of licensed personnel. Units falling within 10% less of their required numbers will be reported "Amber" and those lacking more than 10% will be reported "Red". Refer to Status of Compliance listed below (see Figure 2).

Status of Compliance
GREEN: Yes
AMBER: Within less than 10% of Tier requirement
RED: Lacking more than 10% of Tier requirement
<i>*Tier I will only be Green or Red</i>

Figure 2-2: Status of Compliance

- a. Ensure a working knowledge of how the assigned unit's percentage is calculated. This is done by taking the number of their current Licensed Drivers divided by their authorized strength multiplied by 100 = Compliance percentage.

Calculate their current compliance status percentage using the following formula:

$$\text{Licensed Driver} / \text{Authorized Strength} \times 100 = \text{Compliance Status \%}$$

Unit Examples	Authorized Strength	MTOE Motorized Rolling Stock	Tier	% Required of Assigned Strength	Required Min Licensed Drivers	GCSS-A Licensed Drivers	Compliance Status
Light INF CO	131	2	I	5%	6	53	40.45%
Heavy Weapons INF CO	79	22	III	50%	39	69	87.34%
FSC CO	76	39	IV	70%	53	59	77.63%
BSB CO	83	29	III	50%	41	92	110%
Engineer CO	119	29	III	50%	59	58	49%
Aviation CO	72	12	III	50%	36	40	55.55%
Transportation CO	164	74	IV	70%	114	136	82.92%
FA BTY	45	49	IV	70%	31	105	233.33%
DIV Band (CO sized)	41	1	I	5%	2	14	34.14%
R&R CO	70	6	II	20%	14	7	10.00%

Figure 2-3: Example of Metric and Compliance KRI

- b. Ensure that the requirements of AR 600-55 are met.
- c. Continue to license Soldiers through drivers training throughout the training year in anticipation of normal attrition and conceivable future activations and mobilizations. The minimum recommended number of Drivers Training opportunities per YTC is Two.

CHAPTER 3

SELECTION OF INSTRUCTORS, EXAMINERS, AND OPERATORS

3-1. SELECTION OF INSTRUCTORS/EXAMINERS

The effectiveness of the applicant training, testing, and licensing program depends upon the proper selection and training of a unit licensing team. Good operators or qualified maintenance personnel do not necessarily make good instructor/examiners. Before appointing an individual to be an instructor or examiner, unit commanders will consider factors such as technical knowledge, experience, character, maturity, instructor ability, and expertise on unit equipment.

a. All prospective vehicle/equipment instructors/examiners will:

- (1) Be SGT/E-5 or above. (Below E-5 provide and Memorandum for Record) Exceptions may be made if an E-4/SPC is MOS trained and a SME on a particular vehicle or equipment. Ref. Section 4-1, c, (3) of AR 600-55
- (2) Be interviewed and appointed by the commander in writing to train on specific equipment/vehicles.
- (3) Be licensed to operate the vehicle or equipment on which individual is to instruct or examine.
- (4) An instructor may be qualified to license operators on more than one type of equipment.
- (5) Make appropriate entries on personnel qualification records, evaluation reports, DA Form 348 or 5983-E (Equipment Operator Qualification Record), and DA Form 5984-E (Operator's Permit Record) as instructors.

3-2. SELECTION OF OPERATORS

Personnel selected to drive Army motor vehicles must possess a valid State-issued driver's license prior to testing for a military license. Potential operators not possessing a State-issued license may be issued an "ARMY LIMITED" or "ARMY INCIDENTAL" for special missions on active-duty installations and ARNG training sites such as Camp Swift, Camp Bowie, etc. Commanders or his/her representative(s) must conduct an interview for potential drivers/operators.

a. **CURRENT DRIVER'S LICENSE REVIEW:**

1. **Current and Valid License:** Prior to conducting Phase I training per AR 600-55, TXARNG potential or current vehicle operators must have a valid State-issued driver's license when issued an "ARMY STANDARD" operator permit. Verification

of this is to ensure all soldiers comply with State law and can operate a military vehicle off the installation and on public roads and highways. This removes the possibility of issuing a soldier an Incidental or Limited use permit restricted for the installation only, so that the soldier does not inadvertently drive off the training installation.

2. **Commander's Interview:** To determine eligibility, interviews will be conducted by the Commander or representative who has been appointed in writing. The representative must be in the rank of SSG or above. Areas of concern to be considered for the potential drivers are experience, current qualifications, maturity, attitude, past driving record, hearing, extreme nervousness, medication, or any abnormal characteristics or physical restrictions. Some additional factors to consider are personnel over 25 years of age with driving experience of 1 year or more during which the applicant has driven 4,000 accident-free miles can indicate good judgment and operation skills. Suggested interview questions are in AR 600-55, Appendix B and the Interview Form in Appendix C of this SOP. During the interview process, the commander will also confirm that the candidate meets the medical and physical requirements listed in the next licensing steps. See Figure 3-1 below.

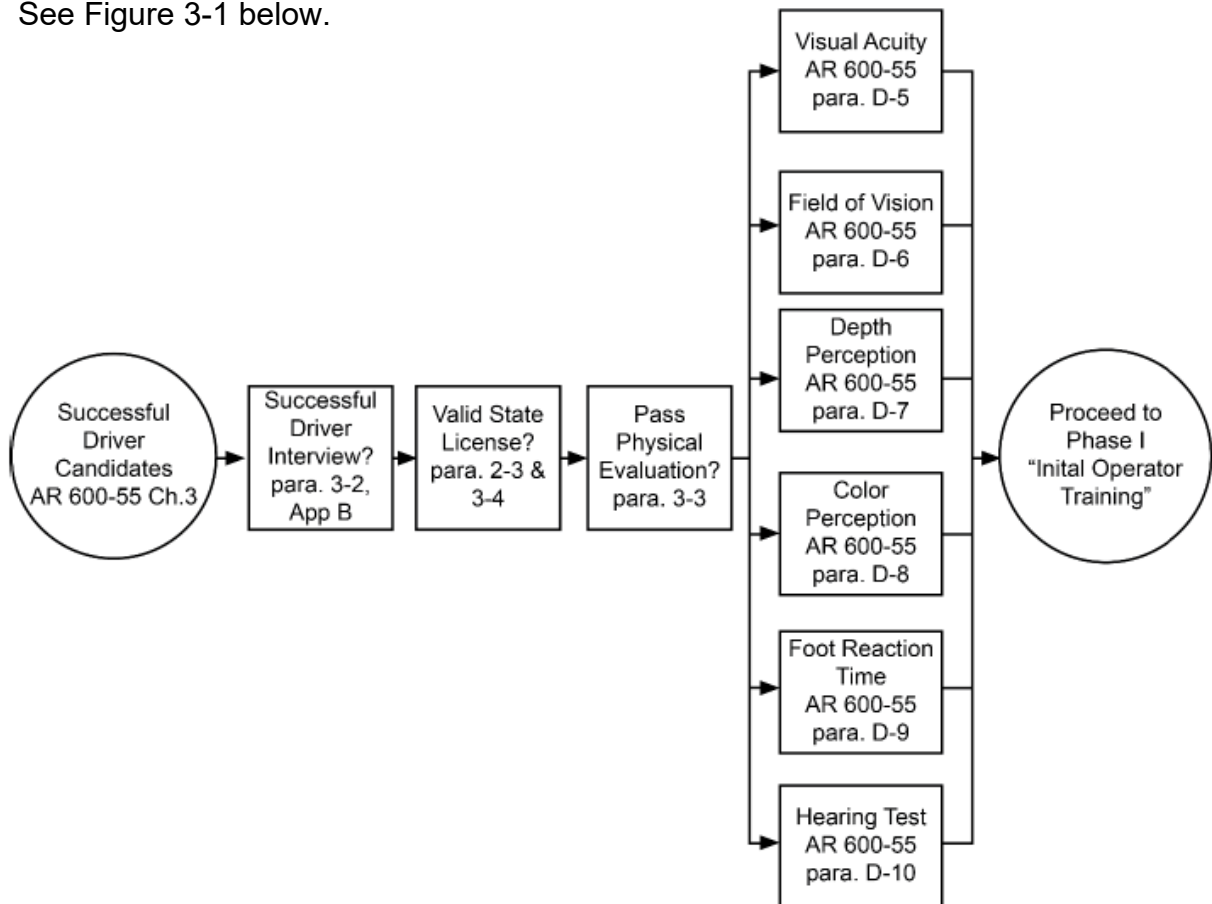

Figure 3-1: Operator Selection (above)

- b. **Medical Review:** Army Service members are required to undergo a valid Periodic Health Assessment (PHA) by qualified medical personnel according to AR 40-501 for restrictions that need to be added to the operator record DA FORM 348 or a disqualifying condition prior to issue/renewal. The assessment is documented in the Individual Medical Readiness (IMR) which can be used to qualify or disqualify the issue/renewal. Physical readiness will be validated prior to issuance of operator permit and validated annually by reviewing operator's medical readiness status in Medical Protection System (MEDPROS).
- c. **Physical Evaluation:** Instructors are to confirm the potential operators possess the minimum physical requirements for safe driving or equipment operation IAW AR 600-55 Physical examinations will be validated by reviewing operator's medical readiness status or Individual Medical Readiness (IMR) in MEDPROS. An overall MEDPROS readiness status that is amber or red is an indicator the individual may not be physically capable of safely operating vehicles and should be referred to the command for review and possible consultation with medical professionals.

CHAPTER 4

OPERATOR TRAINING & TESTING

4-1. OPERATOR TRAINING

Program of Instruction. Per AR 600-55, Appendix E, Driver's Training courses must cover the following units:

- **Phase I:** Initial Operator Training (classroom). *Units A-L*

- (1) Unit A. Introduction, organization of course, and materials review.
- (2) Unit B. State, local, HN, and post traffic regulations and laws.
- (3) Unit C. Basic regulations, responsibilities, and traffic controls (see TC 21 – 305 – 20).
- (4) Unit D. Basic operating procedures (see TC 21 – 305 – 20).
- (5) Unit E. Emergencies (see TC 21 – 305 – 20).
- (6) Unit F. Accident causes and reports (see TC 21 – 305 – 20).
- (7) Unit G. Hazards and safety measures (see TC 21 – 305 – 20).
- (8) Unit H. Operation of government vehicles off post/base (see TC 21 – 305 – 20).
- (9) Unit I. Maintenance responsibilities to include PMCS and required forms (see TC 21 – 305 – 20).
- (10) Unit J. Procedures for transporting personnel (see TC 21 – 305 – 20).
- (11) Unit K. Motor marches and convoy operations (see TC 21 – 305 – 20).
- (12) Unit L. Phase I: Initial Operator Training examination.

- **Phase II: Equipment Training** (classroom and hands-on). *Units M - T*

- (1) Unit M. Introduction to specific vehicle or equipment (classroom and motor pool). Use vehicle specific TC or TRADOC TSP, and operator -10 TM.
- (2) Unit N. Written examination (vehicle specific). When available, use examination from TC. Commands must develop and approve examination for equipment that does not have published TC. Issue trainee OF 346 learner's permit upon successful completion of vehicle examination.
- (3) Unit O. Vehicle operating familiarization using training aids, devices, simulators, and simulations (when avail-able).
- (4) Unit P. Usual Conditions: Operate vehicle/equipment under normal conditions on road driving courses and in controlled routes during daylight, and nighttime using headlights (driving routes to be approved by local command).
- (5) Unit Q. Unusual Conditions: Operate vehicle off-road using training locations approved by local command. Focus training content on the unusual conditions defined in operator technical manual.
- (6) Unit R. Response to emergency situations; vehicle malfunctions (8) Unit T. Operate vehicle specific capabilities (self-recovery winch, materiel handling crane, hydraulics, securing load in cargo bed, and so on). Unit T applies to any additional

required training (beyond driving fundamentals) that ensures operator is proficient at operating all design features of vehicles/equipment.

(7) Unit S. Self-recovery methods (classroom and hands-on).

(8) Unit T. Operate vehicle specific capabilities (self-recovery winch, materiel handling crane, hydraulics, securing load in cargo bed, and so on). Unit T applies to any additional required training (beyond driving fundamentals) that ensures operator is proficient at operating all design features of vehicles/equipment.

- **Phase III: Training Validation/Performance Road Test. Units U – W**

(1) Unit U. PMCS test.

(2) Unit V. Vehicle Control test.

(3) Unit W. Road Test (see para 4 – 8 for tracked vehicles, and para 4 – 9 for mechanical or ground support equipment).

- a. **Master Driver's Verification & Approval:** As mentioned previously in Section 2-1 Responsibilities, the complete drivers training curriculum, to include a completed Deliberate Risk Assessment Worksheet (DD Form 2977), and training schedule must first be reviewed, verified, and approved by the Master Driver Manager in the S3 prior to beginning any drivers training.

- (1) Training Curriculum (lesson slides for Units A-W, tests)
 - (2) Schedule
 - (3) Risk Assessment (DD 2977)
 - (4) Road Test Outline/Route
 - (5) Vehicle Control Test
 - (6) Training Ledger with sections for names, permit type, instructors/examiners, vehicle type and unit.

- b. TC 21-305-20 (wheeled vehicles), TC 21-306 (tracked vehicles) and TCs referenced in appendix K of AR 600-55. These TCs are generic to all MOSs and contain risk assessment matrices, lesson outlines, sample training schedules and training area designs, written and hands-on performance tests, and a listing of associated video programs.

- c. **NOTE:** Reference AR 600-55, Appendix E, guidelines for Commanders and training personnel to use as required guidelines in establishing training programs. These subjects must all be covered in your training schedule. Training Circular (TC) 21-305 series covers Vehicle Specific Training Programs. Additional training material can be found at <https://safety.army.mil/ON-DUTY/Drivers-Training-Toolbox>

For reference, Figures 4-1 through 4-3 below illustrate flow of training below

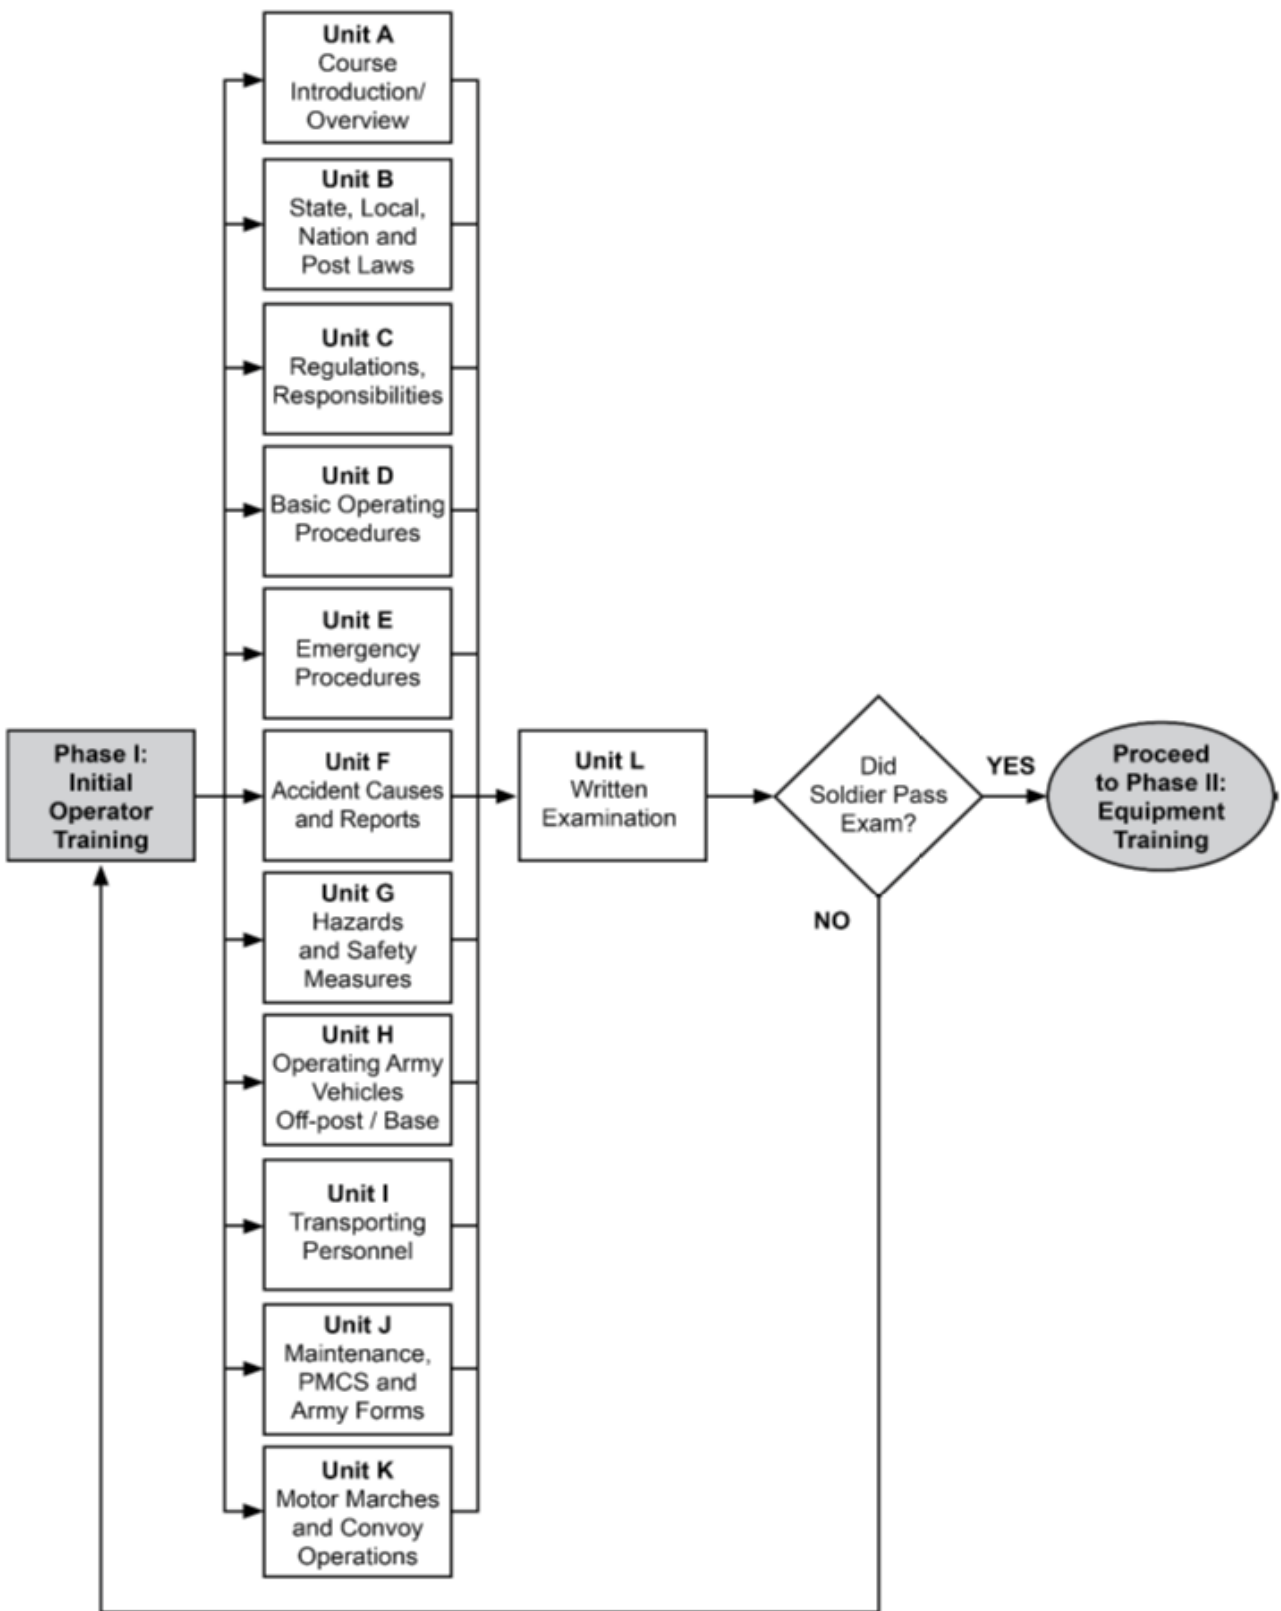

Figure 4-1: Phase I: Initial Operator Training (above)

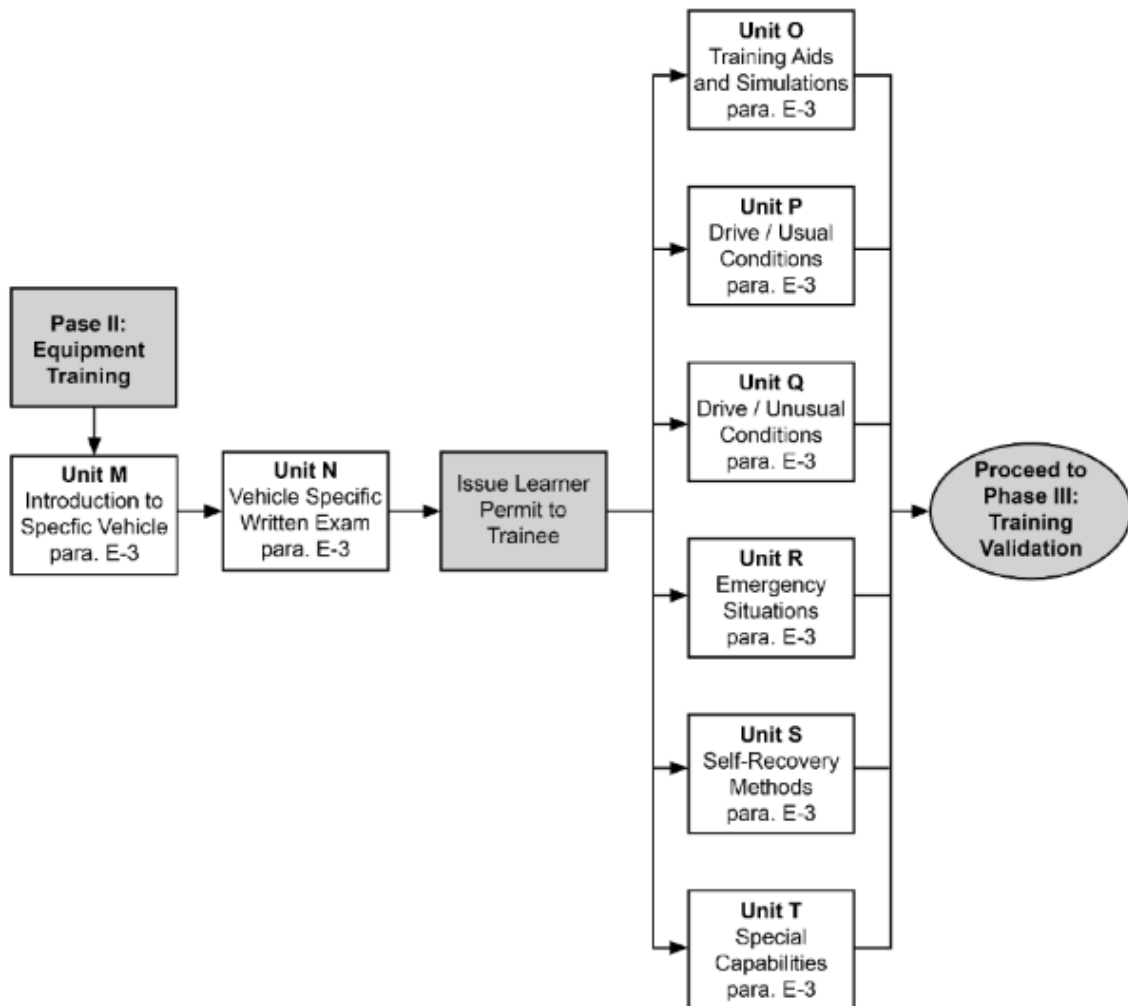

Figure 4-2: Phase II: Equipment Training (above)

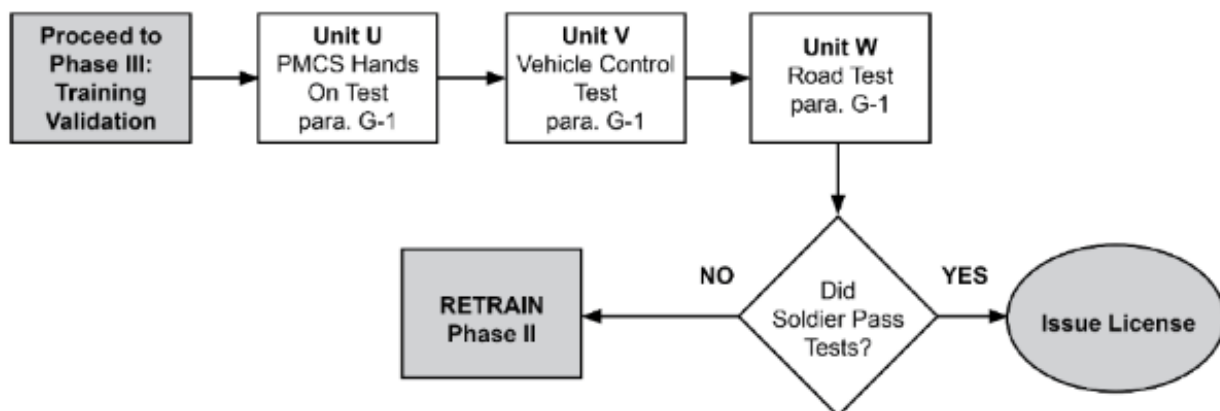

Figure 4-3: Phase III: Training Validation/ Performance Road Test (above)

- d. **Joint Risk Assessment (JRA).** Risk assessments will be conducted at the beginning of every phase of training. The intent of the TXARNG licensing program is to provide effective training, which when done to standard minimizes the likelihood of an accident. Required safety training, to include JRA and DD Form 2977, is a key component of this program. **The applicant must receive detailed instruction on the safe operation of equipment and gain an understanding of Risk Assessment.** This step will also include off road operations, environmental considerations, convoy operations, and other topics. These steps are necessary for the safe and proficient operation of vehicles and equipment.
- e. **Accident-Avoidance Course (AAC).** This step is not required at this time by HQDA as of 18 Apr 2018.
- f. **Preventive Maintenance Checks & Services (PMCS)** training (reference Unit J, Phase I Initial Operator Training). PMCS training provides the potential operator a vehicle/equipment orientation while also emphasizing operator maintenance responsibilities. Upon completion of the Phase II, applicants will proceed with Unit U, PMCS Hands-on Test, in Phase III, Training Validation to demonstrate proficiency. Refer to PMCS Training Verification form included in this SOP.
- g. **Accident Reporting.** (reference Phase I, Unit F) It is essential that operators be trained to obtain all vital information at the scene of an accident and to complete all entries on the Standard Form 91 (SF 91) "Operator's Report of Motor Vehicle Accident" and "DD FORM 518 accident identification card". This step will also include a discussion of operator responsibilities and government liability.

4-2. OPERATOR TESTING

a. Testing (5 Tests)

- Phase I - Unit L Written Exam
- Phase II - Unit N Vehicle Specific Written Exam
- Phase III – Unit U PMCS Hands-On Test
- Phase III – Unit V Vehicle Control Test
- Phase III – Unit W Road Test

Note: All exams are created by unit LI/LE and is verified by the Master Driver for accuracy. Written tests for operators must be taken and will consist of a minimum of 20-25 questions, which is unique to a specific type of equipment. After the potential operator takes the test, it will be reviewed by the License Examiner to ensure a minimum score of 80% is obtained, correctable to 100%. The open book test will be recorded as part of the driver's licensing packet. Unit examiners may create their own tests however instructors should use training materials developed by the TRADOC School having

proponent for the type of vehicle or equipment on which training is to be conducted. A technical manual (TM) can be used for this training when TC's are not published.

b. **"ARMY LEARNER" Permits.**

(1) Operators will not participate in any hands-on vehicle or equipment training without a valid OF 346 or DA FORM 5984-E **"ARMY LEARNER"** Permit. (see also fig 3-1 and chap 6 of AR 600-55)

(2) Learner permits for USAR and ARNG will remain valid if the individual is assigned to the unit and is participating in an active driver training program. Learner permits are valid only during regular training periods (for the period as stated above) and only under the following conditions:

a. The qualified driver, equipment instructor, or examiner accompanies the trainee in the vehicle or on the equipment.

b. The vehicle or equipment is operated within a controlled driving range (no other vehicular traffic) or training area under the supervision of a licensed driver or operator.

(3) The words **"ARMY LEARNER"** will be marked on the face of the Operators Permit ID or DA Form 5984-E. This stamp will be placed over the title of the form so that it does not interfere with the information contained in the blocks. The information can be typed or written but must be in black ink. GCSS-Army produced LEARNER permits (DA Form 5984-E) do not require an additional ARMY LEARNER stamp over the title.

c. **Road/Performance Test.** The purpose of the road/ performance test is to evaluate the driver's ability to drive safely in most on the-road situations or to evaluate the applicant's ability to safely operate equipment. It serves as the basis for issuing an operator's permit and provides an opportunity for instructional reinforcement and counseling.

- A checklist for the driver's road test (Appendix E, "Road Test Score Sheet", DA FORM 6125) will be used to administer the test. A passing score is 25 errors or less; **NOTE that checkmarks indicate the driver has made an error.** The hands-on performance test will be given by unit examiners to evaluate operator proficiency on equipment before issuing a license.
- Tracked Vehicles: A Memorandum For Record will be used stating satisfactory performance of training (tracked vehicles) in place of DA Form 6125.

- (1) The road test will consist of three scored phases: PMCS test, the vehicle control test, and the driving test. If the driver fails any phase of the test, the entire road test will be terminated at that point. (See AR 600-55, Appendix G.)
- (2) Final evaluations will be recorded on DA Form 348/DA Form 5983-E (Equipment Operator Qualification Record) for each vehicle tested. The road test or hands-on test results will be included in the individual's documentation packet and annotated on the Individual Licensing Checklist. Whether the driver passes or fails, the examiner will review the results of the road test with him or her and bring to the driver's attention any weaknesses which require further practice or training.
- (3) Road tests should normally not be given if road or weather conditions present a hazard. The exception is when testing is specifically for driving under such conditions.
- (4) Tracked Vehicles. Students are required to be tested as specified in TC 21-306, Appendix D. Units will create two types of road courses outlined in Appendix D which are for training under unusual (off-road) conditions and for training under usual (urban or road) conditions. Commanders may modify or alter the recommended designs and obstacles to suit their unit's drivers training program or available facilities and resources. A Memorandum For Record will be used stating satisfactory performance of training (tracked vehicles) in place of DA Form 6125.
- (5) Material Handling Equipment. Applicants are required to be tested as specified in TB 600-2.
- (6) Non-Self-Propelled Equipment. Required criteria for licensing applicants on mechanical or ground support equipment are contained in TB 600-1 and TB 600-2.

CHAPTER 5

LICENSING

5-1. All training for vehicles and equipment which require licensing under this SOP (See Appendix D) will be documented on **DA Form 348** and the Qualifications Profile prior to issuing an Operators Permit ID/**DA Form 5984-E**. DA 348 and the Operator's Qualification Record will be maintained by the unit/shop on every person who operates a vehicle or equipment owned or leased by the TXARNG. Qualification on non-self-propelled equipment will be entered on DA Form 348 and the Qualifications Profile, Section I, and training will be entered in Section III.

- a. Although all units of the TXARNG are automated under the Global Combat Support System-Army (GCSS-Army) the Qualification Profile is not an authorized replacement for the manual DA Form 348. GCSS-Army produces a Qualification Profile that reflects equipment operator's qualifications that have been locally transferred into GCSS-Army from the DA Form 348. This process was designed to help streamline automated dispatching procedures through the use of a relational database. The GCSS-Army generated Qualification Profile does not provide the necessary documentation for the Commander to make an appropriate determination for authorization of equipment use.
- b. Once a driver's training packet is completed, training documents must be loaded into the Master Data File of each operator (T Code: PA30) in the following naming convention: Date YYYYMMDD_Form_LName.MI

Example: 20220707_DA348_Smith.J

- (1) This is done to maintain the continuity of soldiers' training records.
- c. The DA Form 348 is a permanent record, and the current record will not be destroyed. All entries will be in black ink or typed unless otherwise stated.
- d. All operator permits will be stamped or marked IAW AR 600-55, Chapter 6-1,d.
- e. Digital Training Management System (DTMS) updates will be completed once an operator receives a standard permit. The soldiers "Military License" and corresponding vehicle license will be updated to reflect all military vehicles and equipment the soldier has received qualification on and is documented on their corresponding DA Form 348.

5-2. INDIVIDUAL TRAINING RECORDS (See Appendix G Sample Documentation and Training Folder). Individual Training Records will be kept for each operator and will consist of:

Mandatory:

- Commander's Interview from current organization
- Photocopy of civilian driver's license
- Manual DA Form 348, and DA Form 348-1 when required
- OF 346 or DA 5984-E (permit) if applicable
- Equipment Specific Training
- Course exams/tests for Phase I and II scores/results
- NVD Exam/test
- NVD Road Performance Test; recertify every 12 months (ARNG)
- NVD Certificate or Memorandum For Record
- DA Form 6125 Road Test Score Sheet
- Route Map used with DA 6125
- Tracked Vehicles: MFR stating satisfactory performance of training outlining appropriate road course taken

If Applicable:

- HAZMAT written test scores/results

A Drivers' Pledge and an SOU for DWI are optional as law enforcement and civilian criminal courts will carry out penalties regarding any law violations. Ignorance of the law (or regulations) is not a defense, therefore these documents themselves are not needed as a pre-requirement for any sort of punishment or consequences. However, commanders have the option to add a driver's pledge or SOU if they so choose.

If a soldier leaves the unit due to transfer within the TMD, IST, PCS, or promotion, the soldier will receive his/her drivers training packet to take it with them to their new unit. Losing Unit will make a copy and retain it for no less than one year.

5-3. ISSUING THE OPERATOR'S PERMIT

- a. Operators Permit ID or DA Form 348 will be issued by a representative of the Commander, who is appointed in writing, to all personnel who complete the prescribed training and tests of this SOP. Whenever there is any reasonable doubt regarding the authenticity or validity of a potential operators State driver's license, or suspicion of a poor driving record, a thorough inquiry must be conducted promptly before issuing/renewal of the Operators Permit ID/DA Form 5984-E.
- b. Standard Permits

- (1) The Operators Permit ID/DA Form 5984-E standard permit applies to all vehicle drivers /equipment operators. The words "**ARMY STANDARD**" will be stamped IAW AR 600-55, Chapter 6. GCSS-Army produced DA Form 5984-E operator permits do not require an additional stamp over the title.
 - (2) Permits will be valid while the service member is assigned to the unit. If a unit member transfers; the gaining unit will verify training and transpose the soldier's information to a new Operators Permit ID /DA Form 5984-E.
 - (3) The expiration date of an Operators Permit ID or DA Form 5984-E will be Set IAW AR 600-55, Chapter 6, paragraph, 6-2. A copy of the license will be maintained in the operator's training record.
 - (4) Operator Permit Ledger. Each issuing authority will maintain an automated or manual ledger of all permits issued. The ledger will be organized by date sequence and will include date of issue, expiration date, permit number, type of equipment qualified to operate, issuing official and remarks block.
- c. All newly assigned operators to the unit will be instructed in local regulations and procedures before operating vehicles/equipment.
- d. Restrictions
- (1) Mark or stamp on the operator's identification card (DA Form 5984E or Operators Permit ID) any restrictions such as "with glasses" or "automatic transmissions only".
 - (2) Mark or stamp on the operator's identification card, "ARMY STANDARD", "ARMY LEARNER", "ARMY INCIDENTAL", or "ARMY LIMITED" for type of permit being issued. GCSS-Army produced operator permits (DA Form 5984E) do not require an additional stamp over the title.
- e. Revocations/Suspensions.
- (1) If an individual's State driver's license is revoked/suspended, their military operator permit is not valid and will also be revoked/suspended with the same suspension period. The unit must update GCSS-A accordingly.
 - (2) For manual procedures, annotate on the DA Form 348 that the license is suspended. Retrieve the DA Form 5984-E from the operator and attach it to the operator's DA Form 348. Again, the unit must update GCSS-A accordingly.

CHAPTER 6

SUSTAINMENT TRAINING, TESTING, AND RECORDS REVIEW

6-1. SUSTAINMENT TRAINING PROGRAM – CHECK RIDE

Commanders will develop and implement a sustainment training program, or Check Ride to be conducted every two years (once in a 2-year period) for any driver with a valid Operators Permit ID /DA Form 5984-E. It will consist of a check ride to assess driving proficiency given by a licensed First Line Leader or Licensed Examiner. The purpose of check rides is to reassess driving proficiency, address topics of importance prescribed by the Commander, and identify weaknesses. Completion of sustainment training will be annotated in GCSS-A the Soldier's Operator Qualification Record, and on the Soldier's DA Form 348, Section III or in the remarks area of DA Form 5983-E (Equipment Operator Qualification Record). Road Test Score Sheet, DA Form 6125-R will be used, and "Check Ride" will be annotated at the top of the form.

Check rides will be conducted for each variant of equipment that an operator is licensed. For instance, if an operator is licensed on an M1097 and an M1151, the operator is only required to conduct one check ride on the most complex piece of equipment, which is the M1151. This check ride is valid for all other vehicles within that specific variant or fleet of vehicles. Unique equipment that does not fall within a specific variant family such as engineer vehicles, forklifts, and other material handling equipment require an annual check ride for each individual piece of equipment.

6-2. UNIT DRIVERS TRAINING RECORDS BIENNIAL REVIEW

Unit LI/LEs will schedule to inspect their soldier's records twice each year. This biennial (twice in a 12-month period) personnel records check is done to find pertinent factors to consider when determining whether the individual is still suitable to safely operate the equipment. In conjunction with the items listed in Section 5-2, *Individual Training Records*, of this SOP, the following must be reviewed:

- a. Expiration of Permits and State-issued Drivers Licenses.
- b. Accidents and moving traffic violations.
- c. Required remedial or refresher training.
- d. License suspension/revocation.
- e. Safety Awards; Accident-free Driving Awards.
- f. Mental or emotional instability
- g. Alcohol or drug-related incidents

- h. The review will be validated and signed by the unit Commander or appointed representatives.

6-3. BATTALION AND BRIGADE CONTINUITY BINDER

Battalion Master Drivers and Brigade Master Driver Managers will schedule to inspect their own continuity binders/records a minimum of twice each year. This is inspectable by the State Master Driver Manager. Continuity binders will be maintained IAW Appendix P, Battalion/Brigade Continuity Binder Checklist in this SOP

CHAPTER 7

SPECIALIZED TRAINING

7-1. SPECIAL DRIVER'S TRAINING

Driver's training is required for soldiers prior to operating army vehicles OCONUS to meet host nation and MACOM requirements. All host nation requirements must be researched prior to deployment. Inquiries to the DOT sponsoring unit about licensing requirements are an essential part of the pre-deployment conference/coordination. Training will include in-country driving regulations, safe driving practices, and identification of international road signs. Completion of this special training must be annotated on the Operators Permit ID/DA Form 5984-E and entered on the DA Form 348/DA Form 5983-E (Equipment Operator Qualification Record).

7-2. FORKLIFT DRIVER'S TRAINING

Special operating instructions for forklift operators can be found in the -10 (technical manual) for operator's level. Further information can be gained by going to TC 21-305-20, Ch. 20. This pertains to basic safety operations of the forklift under any conditions. A check ride is required for each individual forklift annually.

7-3. CONSTRUCTION EQUIPMENT

Applicants are required to be tested as specified in TB 600-2 for graders, wheeled and track type tractors, front loaders, motorized scrapers, rollers, sweepers, crawlers, track and wheel mounted cranes, mixing plants, rock crushers, HYEX, snowplows, ditching machines, and sawmills. A check ride is required for each individual construction/engineer equipment annually.

7-4. HAZMAT TRAINING

Military vehicle operators must meet all licensing requirements according to AR 600-55 and this SOP. This training must, as a minimum, be an introduction or familiarization training per Part 171 Title 49 Code of Federal Regulations. This training can be completed by completing the Defense Ammunition

Center's, "AMMO-67 Course", "HAZMAT Familiarization and Safety in Transportation". HAZMAT training must include but is not limited to the following:

- a. Definitions of Hazardous Materials.
- b. Placard Requirements.
- c. Handling (loading and unloading) of hazardous materials.
- d. Regulations and procedures for transporting hazardous materials.

- e. Operations of emergency and spill equipment.
- f. Forms and records including accident reporting.
- g. Blocking and Bracing.
- h. Vehicle Parking.
- i. Route Selection.

7-5. AMMUNITION TRAINING

Military vehicle operators who will transport/handle Class 1 (U.S. Army Class V) must have specific training IAW NGR 385-64 Chapter 4 and Table 4-2. Transporters will meet the requirements for “Level II-D” at a minimum consisting of:

- a. UXO General.
- b. General HAZMAT Communication.
- c. Introduction to Ammunition (AMMO 45).
- d. HAZMAT Familiarization and Safety in Transportation (AMMO 67).
- e. Class V – Issue, Turn-In Procedures for Using Units (AMMO 64-1).
- f. Class V – Issue, Turn-In Procedures for ASPs.
- g. Army National Guard Ammunition and Explosives (ARNG AE).

7-6. NIGHT VISION DEVICES (NVD)

Commanders will determine what type of night training program best supports the unit mission and understand the night vision device limitations to conduct effective risk assessment before NVD use (See TC-21305-20 and TC 21-305-2 for information on NVDs to assist in these decisions and assessments).

- a. Instructors for NVD training/testing must be NVD qualified (i.e., completed the "Training Program for Night Vision Goggle Driving Operations", TC 21-305-2), and licensed on the vehicle on which training is conducted, be an SGT or above, and appointed by the Commander, in writing, as an NVD certified instructor.

- b. NVD Qualification Training will include sequential instruction in both academic and night driving tasks. A qualified NVD instructor must supervise all instruction and a NVD equipped instructor will be in the vehicle during night driver training.
- c. The minimum required NVD academic subjects are listed in AR 600-55, Appendix I.
- d. A written test (ref. TC 21-305-2) must be passed for NVD qualification.
- e. NVD performance tasks are conducted sequentially in five phases under the supervision of a qualified NVD instructor. A summary of these tasks is shown below (See AR 600-55 Appendix I for all tasks within each phase.).
 - (1) Phase I Tasks: Drive the vehicle without the NVD over a known range during daylight conditions; become comfortable with the actual road and terrain.
 - (2) Phase II Tasks: Using headlights drive vehicle without the NVD over the same range at night.
 - (3) Phase III Tasks: NVD system checks, fitting and use during PMCS.
 - (4) Phase IV Tasks: With all external and internal lights off, drive vehicle over the same range while wearing the NVD.
 - (5) Phase V Tasks: Post operations check and AAR.
- f. To be qualified and licensed on NVDs, motor vehicle operators must be licensed and currently licensed on the vehicle in which they will receive NVD training.
- g. When documenting the applicant's DA Form 348/DA Form 5983-E (Equipment Operator Qualification Record) and Operators Permit ID/DA Form 5984-E, instructors will identify the specific type of NVD on which the individual is qualified.
- h. Refresher NVD Training. Refresher training will be conducted for motor vehicle operators who have not participated in an NVD driving mission in the past 12 months to maintain or regain proficiency. Minimum requirements for NVD refresher training are:
 - (1) Demonstrate proficiency in all qualification training tasks identified in AR 60055, Appendix I.

- (2) Successfully complete an NVD driver performance test given by an NVD instructor.

7-7. RECOVERY TRAINING

- a. Unit Commanders have an obligation to closely review personnel being assigned the additional duty of recovery operator. Also, the Commander must ensure these individuals are sent to Additional Skill Identifier (ASI) producing recovery courses.
- b. This information can be obtained by reviewing the MTOE and reviewing the remarks portion to identify who must have the Additional Skill Identifier (ASI) of H8.
- c. Commanders will take action to ensure that individuals in the maintenance arena assigned to Recovery attend school and upon completion receive the **“H8” (ASI)** qualification on their licenses for Wrecker, Winch, Cable Operated Cranes, and Tow Bar certification as applicable.
- d. Support activities will ensure that their personnel receive recovery training and at a minimum will be Wrecker Qualified.
- e. Reference: TC 21-305-20, Chapter 17 “Vehicle Recovery”.

CHAPTER 8

DISPATCHING PROCEDURES

8-1. GENERAL

- a. Dispatching is the method by which a Commander controls the use of military vehicles and equipment. However, allowing equipment to be used carries with it the responsibility for both the equipment and the operators' safety. Commanders and Full-Time Unit Support (FTUS) Soldiers will ensure the following dispatching guidelines are enforced.
- b. TXARNG vehicles and equipment will be dispatched using GCSS-ARMY automated dispatch system IAW DA PAM 750-8, Para 2-2, Page 5. GCSS-ARMY will be independent from the supporting FMS/UTES.
- c. Roles will be granted to personnel appointed in writing by the Unit Commander to dispatch, return equipment, and print required dispatching documents. Dispatchers may enter and update operator information.
- d. Unit personnel (to include MOS-qualified, authorized, junior enlisted) have the primary responsibility for dispatching unit equipment.
- e. Manual procedures will only be used when GCSS-Army is not available. If manual dispatch procedures must be utilized the Unit Commander or Battalion OIC will sign the manual dispatch, DD Form 1970, IAW DA PAM 750-8, Para 2-3, Pg. 6. DA Form 2401 must be utilized when using manual dispatching procedures. Do not dispatch NMC equipment on manual dispatches.
- f. All tactical vehicles will be operated with Driver and TC/Assistant Driver. Required Personnel Protective Equipment (Advanced Combat Helmet, hearing protection, eye protection) will be used.

8-2. DISPATCHING RESPONSIBILITIES

- a. Commander. Commanders will appoint trained individuals to the duties of Dispatcher in writing. These appointees will be assigned roles in GCSS-Army for dispatching.
- b. Dispatcher.
 - (1) Dispatchers (to include qualified, authorized, junior enlisted) are responsible to ensure operators are licensed and qualified (model specific) in GCSS-ARMY or has a valid DA Form 5984-E and performs PMCS.

- (2) Ensure that drivers prepare a GCSS-Army DA Form 5988-E indicating all items requiring attention and repair. Update logbooks to ensure all operators and supervisors are aware of upcoming maintenance on the equipment.

c. Operator/Supervisor:

- (1) Ensure Dispatch Form is properly completed, and PMCS (before and after mission) performed, IAW applicable –10 TM.
- (2) Ensure dispatched equipment has all its basic issue items, Basic Issue Items (BII), and safety warning devices such as warning triangles, fire extinguishers, tire changing tools etc.
- (3) Complete, sign, and return Dispatch Checklist located in logbook to the dispatcher.
- (4) Return the logbook and any other documentation necessary to close out the dispatch by the expired date/time of return on the dispatch.
- (5) Ensure that the equipment is returned clean, with no trash, fuel tank at 3/4 full or higher and the post-mission PMCS is completed.

8-3 PROCEDURES

- a. An operator can dispatch only one vehicle at a time. If a situation arises where the operator must drive a different vehicle, the current dispatch will be closed. The operator will then conduct dispatch procedures on the second vehicle.
- b. Only the Commander or his designee may authorize the dispatch of equipment. Only the Commander or his/her authorized representative (in writing) may circle X any deadline deficiency for dispatching purposes.
- c. The operator reports to the dispatcher/TAMMS clerk with the request for dispatch, and a DA FORM 5984-E (Operator Permit). The dispatcher checks the operator DA FORM 5984-E. Both the dispatcher and operator will check the equipment mileage and for services due. Vehicles with overdue services automatically deadlines the vehicle administratively. They will not be dispatched unless authorized by the unit Commander who will assume the risk.
- d. The operator uses the equipment TM to perform before operations PMCS. Any fault the operator cannot fix or repair on the spot will be documented on DA 2404 or 5988-E maintenance inspection worksheet. The immediate supervisor will then check the equipment against the GCSS-Army DA Form 5988-E to ensure a proper PMCS has been conducted. All faults that can be repaired

must be completed, parts on hand installed, and parts still required ordered prior to equipment dispatch.

- e. If equipment is acceptable for dispatch, the dispatcher will make required entries in GCSS-ARMY DA Form 5987-E (Motor Equipment Utilization Record) or on DA Form 2401 (Organizational Control Record for Equipment) and DD Form 1970 IAW DA PAM 750-8.
- f. The operator leaves the following with the equipment: the equipment records folder, and all required forms. See DA PAM 750-8. A during operations check, IAW the PMCS table in the operator's manual will be conducted daily and any faults will be noted on GCSS-ARMY DA form 5988-E daily. If no faults are noted at time of PMCS the operator will place the date in the Deficiencies column. At the completion of the day the operator will write his/her initials in the last column.
- g. When the mission is over the operator performs the after operations check per PMCS table in the operator's manual. The operator records any faults that cannot be corrected. The operator prior to turning in to the dispatcher will sign the GCSS-ARMY DA Form 5988-E with faults recorded that cannot be corrected by the operator. The operator will then report said faults to the Maintenance section for repairs and requisition parts for faults which cannot be repaired. The GCSS-ARMY DA Form 5987-E or DD Form 1970 must be released by the official user or the Commander's designated representatives. They will print their name, sign, and enter rank when operator is released, or mission is completed.
- h. Upon completion of dispatch, all equipment will be refueled and cleaned. Each piece of equipment must be always ready for mission.
- i. The operator will turn in all forms to the dispatcher. The dispatcher will properly close out the dispatch using the GCSS-ARMY dispatch process after documenting vehicle miles/kilometers, and hours. If manual procedures were used the dispatcher makes all entries on DA Form 2401 and DD Form 1970 IAW DA PAM 750-8.
- j. A normal dispatch is issued for no longer than 24 hours. Any vehicle that is scheduled to be out of the motor pool after close of business will be on an extended dispatch. The normal extended dispatch period while in garrison will not exceed 7 days. Only the company commander or his designated representative can authorize vehicles to be on an extended dispatch.
- k. Alert dispatches are not authorized for normal garrison and field training exercises.

8-4 REQUIRED EQUIPMENT

- a. Vehicles will have the following equipment and forms before being dispatched:
- b. Spare Tire
- c. Complete Basic Issue Items (BII)
- d. Highway Warning Kits
- e. First Aid Kit
- f. Fire Extinguisher
- g. GCSS-ARMY DA Form 5988-E. (Maintenance and Inspection Worksheet)
- h. GCSS-ARMY DA Form 5987-E Dispatch
- i. Two SF Forms 91, Motor Vehicle Accident Report
- j. Appropriate Operator's Technical Manual (-10 TM)
- k. Two DD Forms 518, Accident Identification Card
- l. Chock block, drip pan(s).
- m. Dispatch checklist

8-5 GROUND SUPPORT EQUIPMENT

- a. All ground support equipment will have a dispatch in the logbook to record running time. The form used to record running time will have the supervisor's release signature for each day of operation in the appropriate block.
- b. The operator is responsible to ensure that the lubrication order and PMCS tables are always adhered to.

8-6 TRAILERS

- a. A dispatch is not required for trailers. Whenever a trailer is required for a mission, the trailer will be attached and documented on the dispatch to the prime mover for PMCS and vehicle operation.
- b. The operator must have the trailer listed on the DA FORM 5984-E.

- c. The unit dispatcher will verify that the operator is qualified to drive a vehicle with trailer before the dispatch is issued.
 - (1) The unit dispatcher will type in the REMARKS block of the GCSS-Army DA Form 5987-E "Trailer attached" as well as the trailer admin number.

APPENDIX B

DRIVERS TRAINING EVALUATION CHECKLIST

1. Is Drivers Training being conducted at BN or higher-level Command?

GO NOGO N/A

a. Has the BN or Higher-Level Command established a driver's training and licensing Program? (TXARNG SOP Chapter 2-4a)			
b. Has the required Duty appointments been appointed by the BN or higher-level Commander? (TXARNG SOP, Chapter 2-4c)			
c. Is the Qualifying Official an E-6 or above appointed in writing by the Commander? (TXARNG SOP, Chapter 2-4c)			
d. Has the delegation for Issuing authority been delegated down to the subordinate unit commanders by the BN or Higher-level commander? (TXARNG SOP, Chapter 1-4)			
e. Are all Testers/Examiners appointed in writing by the Commander IAW AR 600-55, Chapter 4, para 4-2 and Appendix F; does the appointment specify equipment qualified to train and test on? (TXARNG SOP, Chapter 3-1)			
f. Has the Command established an organized Drivers Training and Licensing Binder or folder system to IAW Appendix G TXARNG SOP?			
g. Is Drivers Training being scheduled on the unit's training calendar and training schedule?			

2. Are all Required Regulations and Publications on hand and serviceable?

a. Does the BN/ Unit have Current Copies of the Following (Electronic or hard copy acceptable)? AR 600-55 Dated 17 Sep 2019 AR 385-10 24 Feb 2017 / 1 Jan 2020 TXARNG Drivers Licensing and Dispatching SOP			
b. Are the required training circular, TC 21-305 series present or accessible to all trainers, as the training standard?			

3. Program Control and Issuance:

a. Are records reviews being conducted for all personnel issued a Military License Annually IAW AR 600-55 Chapter 3, 3-1?			
b. Are commanders conducting the Initial Commanders interviews IAW appendix B of AR 600-55?			
c. Are commanders conducting annual reviews IAW AR 600-55 Chapter 4,4-1 (5)?			
d. Are Annual reviews being properly documented on the DA Form 348 IAW AR 600-55, Chapter 4, 4-1(6)?			
e. Does the commander maintain a driver's license ledger for all Driver's permits issued IAW AR 600-55 Chapter 5, 5-1 d?			
f. Is the Commander conducting the initial Instructors Interviews IAW appendix F of AR 600-55?			

g. Is verification of the requirement to have and maintain a valid civilian driver's license being conducted and documented?			
h. Is the Learners Permit being properly issued prior to hands-on Training IAW with AR 600-55 Chapter 6, 6-3?			
i. Does the Driver's License ledger contain the required information as outlined in Chapter 5, 5-1 d. of AR 600-55?			

4. Training Program

GO NO-GO N/A

a. Does the Training Program contain all the regulation-required training topics IAW AR 600-55 Chapter 4 and Appendix E-3 ?			N/A
b. Is all required classroom training being conducted prior to issuance of the learners permit IAW AR 600-55 Chapter 4, 4-3?			
c. Is Accident Avoidance training being conducted before issuance of the military driver's license and every 4 years thereafter or in conjunction with the renewal process? Not Required By HQDA			
d. Does the Unit have an established training program for the Following special purpose endorsements? Night Vision Devices AR 600-55 Chapter 8 & TC 21-305-2 Forklift Drivers TC 21-305-20, Ch. 20 Hazmat Other, AR 600-55 Chapter 4, 4-9 Ammunition and Explosives NGR 385-64 4-2 Hazmat Bulk Fuel AR 600-55 Chapter 4, 4-9			
e. Is sustainment training being conducted and properly documented Biennially as required by AR 600-55, chapter 4, 4-4?			
f. Is all training being conducted and documented in the required required procedures? Classroom Phase: Written exams Hands On training: PMCS performance Test Performance Testing: DA form 6125-R On and Off-Road testing			
g. Is Training documentation available to support all the qualifications being issued from the training session?			

5. Training Documentation and Record Keeping.

GO NO-GO N/A

a. Is All Training being documented on DA Form 348 and DA Form 348-1-R prior to issuance of the military driver's permits?			
b. Is the Automated Qualification Profile entries being properly entered into the GCSS-ARMY system AR 600-55 Ch 4-1b?			
c. Are equipment identification codes (EIC) being used to indicate the equipment qualifications on the Driver Permit/ License IAW TXARNG SOP?			
d. Do all qualifications in Section 1 DA Form 348 have corresponding training remarks in Section 3 TC 21-305 pg. 1-4?			
e. Are restrictions being properly entered in Section 2, of DA Form 348 and DA Form 348-1R including Air Brake Qualification?			

f. Has an Individual Training records folder been established for all Personnel issued a military driver's license? (TXARNG SOP Appendix G)			
g. Does each individual training folder contain the required documentation to meet SOP requirements as follows:			
Copy of Civilian Driver's License			
Copy of Commanders Interview			
Accident Avoidance Training (NOT Required by HQDA)			
DA Form 6125-R Performance test and Biennial Check Ride			
DA Form 348 and DA Form 348-1			
Hazmat Endorsement Tests (if applicable)			
NVD Training written and road test (if applicable)			
ARNG AE Certificate/Qualification			
h. Has DTMS been updated to reflect license?			

Unit: _____

Date: _____

Review conducted by: _____

The overall Rating: Met Standards / Needs Improvement

A Detailed Drivers Selection, Training, Testing, and licensing program review was conducted with the following notations and remarks:

1. Battalion or Higher Command Level Notes.
2. Required Regulations, Publications and Materials.
3. Program Control and Issuance.
4. Training Program.
5. Training Documentation and Records.

Reviewer's Comments:

MEMORANDUM OF RECORD

SUBJECT: Commanders Interview for Military Driver's License

1. This Memorandum is established to serve as a record Training document and documentation of the unit Commanders conducted interview IAW AR 600-55 Appendix B. This memorandum will be filed within the individual's Driver's Training folder.

Individual Interviewed:

_____, _____, _____, _____
Last Name First Name MI Rank

2. The Individual Demonstrates the ability to be selected, trained, tested, and issued a military driver's License. Based On the questions and evaluation in accordance with appendix B of AR 600-55.
- 3, The Above Listed individual is: Cleared/ Not Cleared: to be issued military driver's license.

Date Interviewed: _____

Interviewed by: _____, _____, _____, _____
Print Name Last Name First MI Rank

Signature: _____

COMMANDER'S INTERVIEW FORM

TXARNG Commanders Interview for Drivers Training

Soldier's Info:

Last Name: _____ Date: _____

First Name: _____ Middle Initial: _____

Rank: _____ Unit of Assignment: _____

Privacy Act of 1974

Purpose: TXARNG will use this information to conduct an assessment on your suitability to receive driver's training and operating government equipment.

Routine Uses: The information will be used by and disclosed to TXARNG personnel and contractors or other agents who need the information to assist in activities related to driver's records check. Additionally, TXARNG may share the information with law enforcement or other government agencies as necessary to conduct a driver's record check, or pursuant to its published Privacy Act system of records notice.

Disclosure: Furnishing this information is voluntary; however, failure to furnish the requested information may prevent the completion of your driving records check and denial of your military driver's license.

Fit for Driving Duty Confirmation

The above individual is fit for duty.

The records check conducted as of: **Date:** _____

Purpose: To ensure the licensable Soldiers are physically and mentally fit to operate military vehicles as outlined in the TXARNG Drivers Licensing SOP. The undersigned has reviewed the above Soldier's MEDPROS and verified the Soldier is fit to operate military vehicles and equipment.

Printed Name: _____ **Title/Position:** _____

Signature: _____

Interview Statement

You are going to be asked several questions about yourself and your driving record/experience. Answers dealing with your record, accidents, and violations may be checked against official records. Your answers will be used to help determine your suitability to operate/drive military equipment.

- List all civilian drivers' licenses do you have now? A/ B/ C/ M Other: _____
- Do you have a Military vehicle operator permit from your last unit?
Provide copies.
- Do you have a DA Form 348/E from your previous unit?
- What types of military vehicles do you have experience driving?
Licensed for? (Wheeled/ Tracked/ Trailers etc.)
- Under what types of conditions have you operated military vehicles?
- Which of those vehicle types are you experienced with pulling a trailer?
- How much driving experience do you have total?
- How much experience do you have with operating a 1-1/4-ton truck or larger?
- Have you ever been licensed on a tractor-trailer combination? YES / NO
- Do you have any experience operating Power Generation Equipment (Generators)? 5KW, 10KW, 15KW, 30 and above?
- Have you ever been in a "driver at fault" accident in which someone was injured, or property damage exceeded \$500.00 (civilian or military)? YES/NO

- How many times have you been cited for traffic violations in the past two years?
- Have you ever received a DUI?
- What do you think is the major cause of traffic accidents?
- Do you have any objection to becoming a military motor vehicle operator?
- Do you consider yourself a good, safe driver? YES / NO
- How would you describe your current physical condition as it relates to your ability to drive safely under all conditions?
- Do you wear glasses? YES / NO
- Are you required to wear them when you drive? YES / NO
- Have you ever had difficulty seeing clearly or at night? YES / NO
- Have you ever had any difficulty hearing?
- How would you describe your hearing now?
- Do you have a physical condition, or take medications that may affect your ability to operate military equipment under all conditions? YES / NO
- Do you have any experience in automotive mechanics or related work?
- Have you ever operated military vehicles using night vision devices (NVD)? YES / NO
- What type of vehicles?
- How much experience have you had driving using NVDs?

APPENDIX D

EQUIPMENT REQUIRING LICENSING FOR OPERATION

D-1 LICENSING REQUIREMENTS: All military, civilian, and DOD contract personnel must have an Operators Permit ID/DA FORM 5984-E (Operator's Permit Record) and demonstrate their proficiency to operate the following mechanical or ground support equipment that is either owned or leased by the Government:

- a. Electrical power generating equipment, 0.5KW and above (electric motor driven, diesel engine driven, gasoline engine driven, and gas turbine driven sets).
- b. Gas generating equipment, all sizes, and capacities (such as oxygen, nitrogen, and acetylene).
- c. Water purification sets, all sizes, and capacities except those issued to individual soldiers for their personal use.
- d. Air compressors, all pressures (Not to include installed automatically controlled units.).
- e. Material or cargo handling equipment, all sizes, and capacities, for example, forklift trucks, warehouse tractors and cranes, straddle trucks, and flight line tugs.
- f. Bridging equipment, all bridge erection boats, mobile assault float bridge or ferry transporters, and outboard motors.
- g. Construction equipment or off-road equipment, all sizes and capacities, including but not limited to: tractors, wheeled or tracked cranes, wheeled or tracked front loaders, small emplacement excavators (SEEs) motorized or self-propelled scrapers, rollers, sweepers, and earth augers, saw mills, chain saws, snow plow-rotary, ditching machines, rock crushing and screening plants, asphalt and concrete spreaders, water and bituminous distributors, hot oil heaters, and hydraulic or mechanical vibrating tampers.
- h. Heating and cooling equipment, all sizes, and capacities (Such as air conditioning and refrigeration units powered by liquid fuel engines, space duct-type heaters using liquid fuel, and steam cleaning equipment.).
- i. Pumping equipment: all pumps 50 gallons per minute (GPM) and above, when powered by liquid fuel engines.

APPENDIX F

ACCIDENT-AVOIDANCE COURSE (NOT Required by HQDA as of 18 Apr 2018)

F-1 This appendix identifies the key aspects of accident-avoidance course and components of Safety Training (Licensing Step 6). See AR 385-10 for further insight into accident-avoidance training outlined below.

F-2 The training must be focused at the specific type of equipment being operated. As a minimum, the training will highlight the following areas:

- a. **Equipment Safety Standards.** Emphasis should be placed on safety issues when conducting PMCS before, during, and after Training (Licensing Step 6). Most dead-lining faults on the equipment are safety concerns. Equipment limitations should be stressed with consideration being given to the proper securing of loads or passengers. Operators must be aware that as equipment operators, they are responsible to properly report equipment deficiencies, particularly those impacting the safe operation of the equipment.
- b. **Environmental Factors/Road Conditions.** Normal operating conditions for the equipment should be reviewed and may depend on the unit's mission and training. Accident-Avoidance considerations for varying climate, road conditions, and special situations (off-road driving, blackout driving, or driving with carried or towed cargo) must also be addressed.
- c. **Safety Equipment/Vehicle Operations.**
 1. The operator's safety is important and must be included in any accident-avoidance training. The need for periodic breaks, driver's rest, and the role of the assistant driver will be stressed. AR 385-10, Ch. 11 States:
 - (a) Drivers will not be required to drive a vehicle for more than 10 continuous hours, nor will the combined duty period exceed 12 hours in any 24-hour period without at least eight consecutive hours of rest.
 - (b) If more than 10 hours are needed to complete driving operations the Commander assumes that risk.
 - (c) Drivers will take 15-minute rest breaks every two to three hours of driving or every 100 to 150 miles, whichever occurs first. A 10-minute break after every two hours of continuous driving thereafter, or every 100 to 150 miles, whichever occurs first. During these breaks, driver's will inspect their

vehicles and ensure equipment and cargo are secure. One-hour meal breaks must also be taken.

- (d) Commanders may require additional rest periods based on local conditions or fog operations. They should do so whenever operators can be expected to encounter unusually poor weather or road conditions, when hazardous materials are being transported, or operators will be involved in prolonged or unusually difficult exercises and operations.
 - (e) The use of headphones or earphones while driving Army motor vehicles is prohibited; however, this prohibition does not negate the requirement for wearing hearing protection where conditions require their use (See TB Med 501).
 - (f) Drivers will not consume intoxicating beverages during the eight hours prior to scheduled duty or during their normal duty shift. Additionally, there must be no residual side effects from alcoholic consumption.
 - (g) Drivers will not eat or smoke while a vehicle is in motion. Smoking reduces night vision.
 - (h) Drivers will not operate cellular phones while operating military equipment.
 - i Truck or vehicle commanders (TCs) may use cellular phones for navigation or as part of a pace plan per convoy/training brief. Risk of cellular phone operation during movement will be addressed appropriately and annotated in 2977.
2. Safety measures to guard against asphyxiation must be discussed. Identify driver responsibilities for ensuring that adequate ventilation is present during vehicle/equipment operations. Sleeping in parked vehicles with the engine running is prohibited.
- (a) Fire Prevention is important to safe equipment operations. Training will focus on proper fueling techniques, safe smoking distances and requirements for fire extinguishers.
 - (b) Transport of HAZMAT is taught using the Defense Ammunition Center's (DAC's) Hazmat Familiarization and Safety in Transportation AMMO-67 online course. During this

training, safe parking procedures, proper fueling techniques while loaded, and proper loading and unloading techniques must be addressed.

(c) Transport of Ammunition and Explosives is taught through the ARNG AE. This 2-day classroom course is provided through the Army Ground Safety Office or Training Center Command. This course meets the requirements of NGR 385-64 Level II-D vehicle operator with ammunition storage and/or transportation responsibility and is required before transporting or handling any Class 1 (U.S. Army Class V).

(d) Proper use of safety equipment is a key factor in defensive driving. Operators must have a thorough understanding of the safety equipment requirements for operating the equipment. Instruction must be given to ensure that the operator knows how and when to use the safety equipment. Safety equipment such as eye and hearing protection, chock blocks, safety chains, fire extinguishers and caution devices are of no value if not properly utilized.

APPENDIX G

DOCUMENTATION AND DRIVERS TRAINING FOLDER.

G-1 Training Documentation: In accordance with AR 600-55, Appendix L, all training will be documented using DA Form 348 and DA Form 348-1-R. In addition, the following forms will be used to ensure all training requirements have been successfully completed and documented. All forms will be compiled into the individual's Drivers Training Folders.

- a. Individual Training Folders: All personnel issued a military driver's license in the Texas Army National Guard will have an individual drivers training folder created and maintained. The following documentation will be required as a minimum for everyone issued a military driver's license.

Mandatory:

- Commander's Interview from current organization
- Photocopy of civilian driver's license
- DA Form 348, and DA Form 348-1 (Army license) if applicable
- OF 346 or DA 5984-E (permit) if applicable
- Equipment Specific Training
- Course exams/tests for Phase I and II scores/results
- NVD exam/test
- NVD Road Performance Test; recertify every 12 months (ARNG)
- NVD certificate / Memorandum For Record
- DA Form 6125 Road Test Score Sheet
- Tracked Vehicles: Memorandum For Record stating satisfactory performance of training (tracked vehicles)

If Applicable:

- HAZMAT written test scores/results
- Ammunition handlers DL Certificates

REMARKS: The intent is that upon completion of training, the individual's driver's training packet will be reviewed, updated, and will include all pertinent paperwork.

G-2 Disposition of Documentation: The required training documentation as listed above will be maintained following the below listed guidance:

- a. Commander's Interview: (Required) Commander's interviews are required prior to that commander allowing the candidate to attend driver's training and issuing the driver's license. A signed commander's interview will be maintained in the training folder. Commanders will also consider the candidate's eligibility based on physical and medical evaluation using MEDPROS.

- b. Copy of Civilian License: (Required) A copy of the service member's valid, State-issued driver's license will be maintained in the training folders. (Must be updated each time the individual renews civilian license.)
- c. DA Form 348 and DA Form 348-1-R (Required) Documentation must be filled out with all drivers' qualifications and signed by Commander or authorized representative.
- d. Driver permit (OF 346 or DA 5984-E)
- e. Accident Avoidance Course: Not required by HQDA nor this TXARNG Driver's Licensing SOP.
- f. HAZMAT Tests: (Required) Copies of the HAZMAT written test scores will be maintained until replaced with the re-certification test every 2 years.
- g. NVD Final Written Test: (Required if Applicable) NVD written test is only required for initially qualifying the individual on the NVD's. NVD's must be re-certified every two years but only requires the Driving Road Test to be completed. The Initial written test will be transferred onto the DA Form 348 and maintained in the training folder for three years. After the initial 3 years and transference to the DA Form 348, the written test for the NVD's may be discarded.
- h. NVD Road Performance Test: (Required if Applicable) The NVD road performance test will be maintained in the folder until replaced with the new performance test every 12 months.
- i. DA Form 6125-R Initial Road Test: (Required) The DA Form 6125-R road performance test will be maintained as well follow-on Biennial Sustainment Road tests 6125-R (updated every two years).
- j. Biennial Sustainment Road Test 6125-R: (Required) Each Biennial Sustainment Road Test will be documented using the DA Form 6125-R. This form will replace the initial road Test.
- k. Drivers Training Folder Check Sheet: (Suggested) the enclosed training folder check sheet Should be maintained inside the folders, re-done, and replaced annually as part of the annual review process.
- l. Training Verification (via previously issued license: (Suggested) If this is from DA Form 348 the 348 will be permanently left in the training folder. If not from the DA Form 348 and not listed above, then once transposed onto DA Form 348 and DA Form 348-1R may be discarded if older than 3 years.

Equipment-Specific Training Form: (Suggested) The equipment-specific Training Form is completed for each item trained and tested on after the initial training and licensing. This Form is used to document training conducted and is transposed onto the DA Form 348 and DA Form 348-1-R as qualifications and training remarks. Replace and destroy old form once updated form is completed and filed.

APPENDIX H

TRAINING VERIFICATION FROM PREVIOUS TRAINING

Purpose: This form is used to verify previous training documentation of newly assigned soldiers IOT issue driver's license permits. Document to be filed in individual's Driver's Training Folder.

Endorsement	Equipment	Date Verified	Verified from	Signature
Training Conducted	M1165	01 JAN 2022	DA 348-1	
Licensed on M1165	M1165	01 JAN 2022	DA 348-1	

1. I certify that all training listed on this form was verified from either the Qualification Profile or DA Form 348 provided by the previous Unit.

APPENDIX O

MOTOR VEHICLE OPERATOR DRIVER TRAINING COURSE

(Extract from AR 600-55)

E-3. Program of instruction

The three successive phases of operator training are broken down into the following POI. The Phase I (Initial Operator Training) consists of units A through L. The Phase II (Equipment Training) consists of units M through T, and the Phase III (Training Validation/Equipment Road Test) consists of units U through W.

a. Phase I: Initial Operator Training (classroom).

- (1) *Unit A.* Introduction, organization of course, and materials review.
- (2) *Unit B.* State, local, HN, and post traffic regulations and laws.
- (3) *Unit C.* Basic regulations, responsibilities, and traffic controls (see TC 21 – 305 – 20).
- (4) *Unit D.* Basic operating procedures (see TC 21 – 305 – 20).
- (5) *Unit E.* Emergencies (see TC 21 – 305 – 20).
- (6) *Unit F.* Accident causes and reports (see TC 21 – 305 – 20).
- (7) *Unit G.* Hazards and safety measures (see TC 21 – 305 – 20).
- (8) *Unit H.* Operation of government vehicles off post/base (see TC 21 – 305 – 20).
- (9) *Unit I.* Maintenance responsibilities to include PMCS and required forms (see TC 21 – 305 – 20).
- (10) *Unit J.* Procedures for transporting personnel (see TC 21 – 305 – 20).
- (11) *Unit K.* Motor marches and convoy operations (see TC 21 – 305 – 20).
- (12) *Unit L.* Phase I: Initial Operator Training examination.

b. Phase II: Equipment Training (classroom and hands-on).

- (1) *Unit M.* Introduction to specific vehicle or equipment (classroom and motor pool). Use vehicle specific TC or TRADOC TSP, and operator -10 TM.
- (2) *Unit N.* Written examination (vehicle specific). When available, use examination from TC. Commands must develop and approve examination for equipment that does not have published TC. Issue trainee OF 346 learner's permit upon successful completion of vehicle examination.
- (3) *Unit O.* Vehicle operating familiarization using training aids, devices, simulators, and simulations (when available).
- (4) *Unit P.* Usual Conditions: Operate vehicle/equipment under normal conditions on road driving courses and in controlled routes during daylight, and nighttime using headlights (driving routes to be approved by local command).
- (5) *Unit Q.* Unusual Conditions: Operate vehicle off-road using training locations approved by local command. Focus training content on the unusual conditions defined in operator technical manual.
- (6) *Unit R.* Response to emergency situations; vehicle malfunctions (simulators and on driving courses).
- (7) *Unit S.* Self-recovery methods (classroom and hands-on).
- (8) *Unit T.* Operate vehicle specific capabilities (self-recovery winch, materiel handling crane, hydraulics, securing load in cargo bed, and so on). Unit T applies to any additional required training (beyond driving fundamentals) that ensures operator is proficient at operating all design features of vehicles/equipment.

c. Phase III: Training Validation/Performance Road Test.

- (1) *Unit U.* PMCS test.
- (2) *Unit V.* Vehicle Control test.
- (3) *Unit W.* Road Test (see para 4 – 8 for tracked vehicles, and para 4 – 9 for mechanical or ground support equipment).

APPENDIX P
BRIGADE / BATTALION CONTINUITY BINDER CHECKLIST

Reviewed biannually (twice within 12-month period)

Purpose: This checklist is to help brigades and battalions ensure their continuity binders comply with State SOP guidelines.

TAB A: INTRODUCTION

This guide is intended for use by the Master Driver, Unit License Instructors, Licensed Examiners and Commander. Its objective is to improve the safety and training of our operators and ensure compliance with regulatory requirements (Army Regulation 600-55, dated 17 Sep 2019 and the TXARNG Drivers Licensing and Dispatching SOP). Units may have existing programs suitable for your unit; however, this guide provides the processes and standards which helps to ensure that the TXARNG as a whole conducts licensing in a uniformed manner.

1. The "licensing steps" are intended to clarify and reflect the regulatory requirements of AR 600-55 as well as provide a basic structure for units to build upon with their own ideas for their battalion SOP. Commanders who assume the risk of using a different program other than what is prescribed in this guide must ensure they maintain compliance with AR 600-55. Tabs located herein are provided as additional templates and references.
2. Utilize necessary forms, checklists, and memorandums. Document individual and collective training events to ensure that all vital supporting documents are included in every individual's driver's training file/folder.
3. At the end of each phase of the 3-phased drivers training process, the LI/LE or Master Driver (MD) will build the qualification records for each soldier in GCSS-A. This process was formerly completed by the "License Official". The appointed LI/LE or MD will now build the qualification record, print learner licenses, and standard licenses. These LI/LEs and MDs will also be responsible for assembling individual driver's training folder (file/packet) for their unit personnel.
4. Lastly, all personnel are highly encouraged to retain a personal copy of all their drivers training documents should the unit copy become lost or destroyed.

TAB B:
APPOINTMENT ORDERS

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
AR 600-55, Para 1-4h (3), 4-2a (1), DA PAM 750-8, Chap 2

TASK: Appoint LI/LE or MD to be able to issue licenses.

CONDITION: Given authority in writing to conduct unit driver licensing program.

STANDARD: Identify and appoint personnel, in writing, unit personnel designated to perform the duties of the positions outlined below (Note minimum required grade for each position). Reference CH 4-1 of AR 600-55.

<u>POSITION</u>	<u>MINIMUM RANK</u>
a. Master Driver Manager (Advisor to the BDE CDR)	SFC/GS-15
b. Master Driver / (Advisor to the BN CDR)	SSG/GS-14
c. Senior Truckmaster / Truck Master (If applicable)	SFC/SSG
d. Commander's Interview/Appointed Representative	SSG
e. License Instructors (equipment/vehicles)	SGT (SPC if SME)
f. License Examiners (equipment/vehicles)	SGT
g. Dispatcher (Assigned unit clerks may be junior enlisted)	N/A

REMARKS:

- Biannually (twice in 12-month period) review and update the duty appointment letters.
- Units may use master lists of additional duty assignments.
- A unit memorandum is required for any deviation from this guide.
- Senior Truckmaster and Truckmaster rank is SFC and SSG respectively. Only applicable to motor transport units.

TAB C:
CURRENT DRIVERS LICENSE REVIEW AND COMMANDER'S INTERVIEW

LICENSING STEP 1 (2 parts)

1. (VERIFY VALID STATE DRIVER'S LICENSE)

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP, AR 600-55, Ch. 2

TASK: Verify the applicant possesses a valid civilian driver's license. Make a copy of the individual's State driver's license and one copy of a previously issued DA FORM 5984-E, Operator Permit Record (if applicable). Retain copies with the individual's driver training packet.

CONDITION: Copy civilian state driver license and any previous DA FORM 5984E's, Operator Permit Record (if applicable).

STANDARD: Determine that the state license has **not expired**, document any restrictions such as eyeglasses, financial responsibility, etc. Ensure that the DA Form 5984-E (Operator's Permit Record) expiration date does not exceed 5 years or the expiration of the individual's state driver's license.

REMARKS: If there is any reasonable doubt regarding the validity of a soldier's State-issued driver's license, the battalions' Master Drivers are responsible for vetting the license.

2. (COMMANDER'S INTERVIEW)

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
AR 600-55, Chapter 3, App B

TASK: Commander or his/her representative will conduct an interview for the selection process.

CONDITION: The Commander's Interview memo (located in Appendix C) will be recorded and placed in the individuals' drivers training folder and appropriate annotations made on the DA Form 348.

STANDARD: Commanders are to interview subjectively to determine the driver's maturity, attitude, past driving record, nervousness, or any abnormal

characteristics. Commander or representative will also confirm that the candidate meets all physical and medical requirements.

REMARKS: TXARNG Drivers Licensing and Dispatching SOP allows the Commander's interview to be conducted by his or her appointed representative in the rank of SSG/E6 or above.

TAB D:
MEDICAL REVIEW

LICENSING STEP 2

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
AR 40-501, AR 600-55, Chapter 3 (3-3)

TASK: 1. Conduct a review of the applicant's medical condition.
2. Determine if applicant is physically and mentally fit to operate government motor vehicles and/or equipment.

CONDITION: Review current results from Periodic Health Assessment (PHA) which is in the Individual Medical Review (IMR).

STANDARD: Review the applicant's current IMR and question the individual about any possible changes in medical condition since the last periodic assessment was conducted.

REMARKS: Carefully review applicant State driver license for various medical restrictions or limitations such as the use of corrective eyewear, valid for daylight driving only, and color blindness.

TAB E:
PHYSICAL EVALUATION

LICENSING STEP 3

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP,
AR 600-55, Chapter 3, Para 3-3, AR 600-55 Appendix D

TASK: Ensure the applicant possesses the minimum physical ability to safely operate the military equipment/vehicle for which the license is being pursued. (TXARNG soldiers must produce a current and valid State driver's license to obtain an **ARMY STANDARD** operator permit. The instructor must determine if the potential operator has the physical ability and coordination to operate the equipment in a safe and prudent manner) The driver testing and training device (national stock number 6930-00-526-3639) contains all the materials and instructions necessary to conduct the physical evaluation measures listed in this appendix).

Equivalent testing instruments may be constructed locally, provided they are made to measure accurately the physical characteristics as pre-scribed. This includes local procurement of eye testing charts, and the use of computers to determine foot reaction times using a Universal Serial Bus (USB) foot-controlled pedal. Organizations that do not possess the driver testing and training device must coordinate with their higher headquarters to procure the device.

CONDITION: Valid, State-issued license and the equipment to be licensed on.

STANDARD: Observe the potential operator throughout the specific training and testing process to ensure he or she has the physical attributes needed to operate the equipment. The Drivers Testing and Training Device can be used for this process. Reference AR 600-55, Ch. 3-3, b

REMARKS: Physical evaluation tests are intended for diagnostics, guidance, and counseling purpose(s). They will ensure that all operators of motor vehicles possess the physical requirements for safe driving.

The LI/LE's observations are sufficient for the physical evaluation.

TAB F:

JOINT RISK ASSESSMENT (JRA)

LICENSING STEP 4

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
AR 385-10, DA PAM 385-30, ATP 5-19

TASK: Brief the license applicant/candidate on the safe operation and characteristics of a piece of equipment or vehicle. Conduct a Joint Risk Assessment (JRA) before beginning training. Provide accident avoidance, off road operations, environmental consideration, and convoy operations training.

CONDITION: Given the piece of equipment for which the license is being issued, appropriate manuals, and an instructor with adequate knowledge about its characteristics and operation. JRA Worksheet DD Form 2977 is completed prior to training.

STANDARD: The soldier applying for the license demonstrates an understanding of safety procedures and limitations of the equipment. The applicant must also display ability to perform JRA and accident-avoidance techniques.

REMARKS: Safety is a command responsibility. Continue to emphasize safety awareness as it will prevent unnecessary injuries, equipment loss, as well as save lives. Safety contributes toward the readiness of our units.

The potential operator for a vehicle/equipment license must receive detailed instruction in the safe operation of the equipment. The safety training must emphasize measures to prevent commonly occurring accidents and avoid hazards related to the operation of the equipment.

The licensed applicant will be instructed in safety, operator responsibility, the role "attitude" plays in safe operation, and liabilities associated with operating military equipment.

TAB F:

JOINT RISK ASSESSMENT (JRA)

JRA DEFINITION: JRA is the process of identifying, assessing, and controlling risks arising from operational factors and making decisions that balance risk cost with mission benefits. The guiding principles of JRA are as follows:

- Integrate JRA into all phases of missions and operations.
- Make risk decisions at the appropriate level.
- Accept no unnecessary risk.
- Apply the process cyclically and continuously.
- Be risk-averse (disinclined or reluctant to take risks). Do not take unnecessary risks. Identify and control the hazards and proceed carefully at every step towards completing the mission.

JRA PROCESS: JRA is a five-step process:

1. Identify hazards.
2. Assess hazards to determine risk.
3. Develop controls and make risk decisions.
4. Implement controls.
5. Supervise and evaluate.

SAFETY: <https://safety.army.mil/ON-DUTY/Government-Motor-Vehicle>

Helpful information can be found at the army safety website listed above. Commanders, Master Drivers, LI/LEs and leaders at all levels should be reviewing the drivers training toolbox. The site also provides a link to the Joint Risk Assessment Tool or JRAT located at the link below.

JRAT: <https://jrat.safety.army.mil> the joint risk assessment tool will aid leaders and drivers training program managers in risk identification for missions such as but not limited convoy operations, tactical convoy operations, and movement to conduct drivers training. JRAT will also aid in creation of DD2977.

TAB G:
PMCS TRAINING

LICENSING STEP 6

REFERENCES: Appropriate -10 Level Technical Manual (TM), Training Circulars (TC)

TASK: Perform operator preventive maintenance checks and services (PMCS) on military vehicles and equipment for which the license is being issued.

CONDITION: Given instruction, a DA Form 2404 or DA Form 5988-E, military equipment, appropriate equipment operator's manual (-10 and -12 lube order), equipment records folder, equipment Basic Issue Items (BI), rags, coolant and lubricants, and a pencil.

STANDARD: Inspect the equipment according to the PMCS checklist in the operator's manual. Correct all operator level faults and properly record all other deficiencies legibly on the DA Form 2404/5988-E. If no faults are noted, the proper entries will be made on the DA form 2404/5988-E.

REMARKS: The applicant's First Line Leader or assigned instructor will conduct operator training. The FLL/instructor will also schedule testing when required proficiency level is achieved.

Instructors and supervisors must ensure the PMCS checklist from the appropriate -10 operator's technical manual is used every time PMCS is conducted.

Ensure the licensing instructor has coordinated for the resources and considered the recommendations on the following page.

Train potential operators to perform operator PMCS on a military vehicle/equipment for which they are to be licensed.

Emphasize identification of all critical parts and components required to properly perform pre, during, and post operation PMCS procedures IAW the appropriate TM.

PMCS TRAINING RECOMMENDATIONS AND RESOURCES

Remarks:

Teach potential operators how to use the PMCS checklist found in Chapter 2 of the equipment -10 Operators' Manual. Ensure the following topics are covered in the instruction: Item Numbers, inspection intervals, crewmember procedures, and identification of dead-lining faults.

Teach the applicant to properly complete the DA Form 2404 or DA Form 5988-E, Equipment Maintenance, and Inspection Worksheet. DA PAM 750-8 provides detailed instructions. Operators must understand how to annotate faults, indicate corrective action, and forward the documents through the proper channels.

Instruct the applicant on all crewmember procedures. Ensure operator/crew deficiencies are identified and the corrective actions are demonstrated. The potential operator must clearly understand operational limitations of the equipment when there are uncorrected faults.

Place special emphasis on safety hazards inherent in the operation and maintenance of the equipment. Review all "Warnings" found in the Crewmember Procedures portion of the PMCS checklist.

Resources:

The equipment to be licensed on.

The -10 Operator's manual and -12 Lubrication Order, if applicable.

All Basic Issue Items (BII), Accessory Kits, and system components (radios, weapons...) associated with the equipment.

Equipment Logbook.

DA Form 2404/5988-E, Equipment Maintenance, and Inspection Worksheet. Samples on Page 79 for 5988-E, and Page 80 for DA Form 2404.

Lubricants and Antifreeze if applicable.

EQUIPMENT DATA

ADMIN NUM, EQUIP MODEL, EQUIP NOUN, EQUIP NSN, EQUIP SERIAL NUM, and REGISTRATION NUM is retrieved from the equipment data file. No entries from the operator/crew chief are needed in these areas. The operator/crew chief must ensure that data contained in these areas are correct prior to pulling PMCS. If any fields are not current, notify the ULLS operator so he/she can update the data fields through the ULLS Menu process. For more information about these data fields, refer to the ULLS End User Manual.

TYPE INSPECTION. Operator/crew chief requests the ULLS operator to print an Equipment Maintenance and Inspection Worksheet with the type inspection to be performed. See ULLS End User Manual or chapter 3 of this pamphlet for an explanation of these symbols.

ACCIDENT REPORTING TRAINING

LICENSING STEP 7

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
TC 21-305-20
DA PAM 385-40

TASK: Report an accident and complete all appropriate accident reporting Forms.

CONDITION: Given: SF 91, Operator's Report of Motor Vehicle Accident, DD Form 518, Accident Identification Card Prepared accident scenario

STANDARD: Properly complete documents, as prescribed during a Simulated auto accident.

REMARKS: Whenever military vehicles are involved in accidents, regardless of how trivial the accident may seem, specific forms will be prepared by the driver. It is essential that personnel be trained to obtain all vital information at the scene of the accident and to complete all entries on the form.

All incidents will be well documented and will be reported to the Unit Safety Officer/NCO, Unit Commander, or next higher commander.

Liability considerations of improperly documented accidents will be addressed in this training.

Sample DD 518 is located on Page 80 and sample SF 91 is located on

PRIVACY ACT STATEMENT

AUTHORITY: Sec 638a, Title 31, USC and EO 9397.

PRINCIPAL PURPOSE: To provide persons involved in an accident with a DoD owned/leased vehicle the identity of the person with the authority to act on the matter.

ROUTINE USES: Placed in each vehicle for purpose stated above. When a DoD vehicle is involved in an accident, the driver provides the other party(s) with a properly executed DD Form 518. The SSN is requested because of similarity of names, to further identify the driver of the DoD vehicle.

DISCLOSURE IS VOLUNTARY: No disciplinary action is taken in cases where the SSN is not provided.

DD Form 518, OCT 78 (EG) PREVIOUS EDITION IS OBSOLETE.
Designed using Perform Pro, WHS/DIOR, Dec 94

DD Form 518 Reverse, OCT 78

Note: Adding SSN is strictly voluntary.

MOTOR VEHICLE ACCIDENT REPORT	Please read the Privacy Act State- ment on Page 3	INSTRUCTIONS: Sections I through IX are filled out by the vehicle operator. Section X, items 72 thru 82c are filled out by the operator's supervisor. Section XI thru XIII are filled out by an accident investigator for bodily injury, fatality, and/or damage exceeding \$500.

SPACE FOR DETAILED ANSWERS. INDICATE SECTION AND ITEM NUMBER FOR EACH ANSWER. IF MORE SPACE IS NEEDED, CONTINUE ITEMS ON PLAIN BOND PAPER.					
Mrs. Smith was complaining about neck problems. She looked OK at the scene of the accident.					
PRIVACY ACT STATEMENT					
The information on this form is subject to the Privacy Act of 1974 (5 U.S.C. section 552a). Authority to collect the information is Title 40 U.S.C. Section 491 and the title 31 U.S.C. Section 7701. The formation is required by federal Government agencies to administer motor vehicle programs, including maintaining records on accidents involving privately owned and Federal fleet vehicles and collecting accident claims resulting from accidents. Federal employees, and employees under contract, will use the information only in the performance of their official duties. Routine uses of the collected information may include disclosures to: appropriate Federal, State, or local agencies or contractors when relevant to civil, criminal, or regulatory investigations or prosecutions; the Office of personnel Management and the General Accounting Office for program evaluation purposes; a Member of Congress or staff in response to a request for assistance by the individual of record; another Federal agency, including the Department of Treasury and Justice, or a court under judicial proceedings; agency Inspectors General in conducting audits; private insurance and the collection agencies (including agencies under contract to Treasury to collect debt); and to other agency finance offices for federal management and debt collection. Furnishing the requested information is mandatory, including the Social security Number or Taxpayer's Identification Number (TIN) for use as a unique identifier to ensure accurate identification for individuals or firms in the system.					
SECTION IX - FEDERAL DRIVER CERTIFICATION					
I certify that the information on this form (Sections I thru VII) is correct to the best of my knowledge and belief.

TAB I:
WRITTEN TEST

LICENSING STEP 8

REFERENCES:	TXARNG Drivers Licensing and Dispatching SOP AR 600-55 DA PAM 750-8 TC 21-305-7, Ch. 7 TC 21-305-8, Ch. 7
TASK:	Administer driver/operator written test of 20-25 questions.
CONDITION:	Given an examination booklet, DD Form 1970/5987-E, DA Form 2404/ 5988-E, pencil, vehicle operator's manual, and equipment records folder.
STANDARD:	After the applicant takes the test, it will be reviewed with the instructor too ensure a correctable score of 100% is achieved.
REMARKS:	Administration of the written test including scoring, reviewing, documenting, and security of the test materials. Many operators will need to review initially incorrect answers with the instructor to answer all questions correctly. The written test will be administered in accordance with the vehicle specific Training Circular (TC).

TAB J:
LEARNER PERMIT

LICENSING STEP 9

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP,
AR 600-55, Para 6-3b.

TASK: The Learner Permit is issued to a license applicant after completion of Licensing steps 1-8 and prior to operating the equipment. The **Learner** permit must be issued before conducting the road performance test.

CONDITION: Given instructions – DA Form 5984-E (Operator's Permit Record) also known as Government Motor Vehicle Operator's Identification Card, stamped "**Army Learner**", is valid for the operation of military vehicles within specific limitations prescribed in AR 600-55, Para 6-3b.

STANDARD: Issue Army learner permit after completing Unit N (Vehicle Specific Written Exam), during Phase II The learner permit will be surrendered and destroyed upon completion of training.

REMARKS: After the Learner Permit is issued the First Line Leader must conduct/coordinate the training to prepare the applicant for safe operation and performance testing.

The issuance of a learner's permit is a necessary requirement for legal reasons before operating a vehicle on public roads. This requirement does not apply to ground equipment (i.e., generators, pressure washers, welding equipment, etc.).

Once the learners permit has been issued, it will show up on the ledger as Army Learner's. Before an army standard permit is issued a learner's permit must be issued.

TAB K:
ROAD/PERFORMANCE TEST

LICENSING STEP 10

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
AR 600-55 (The Army Driver and Operator Standardization Program)
AR 611-5 (Personnel and Classification Testing)

TASK: The unit licensing examiner will administer the road test and complete the road test checklist IAW DA Form 6125-R.

CONDITION: Given appropriate vehicle/equipment operator's manual, DA Form 2404/5988-E, DA Forms 6125-R, and a designated driving test course which meets the requirements of the DA Form 6125-R.

STANDARD: The road test will consist of 3 scored phases. PMCS test, the vehicle control test, and the on-the-road test.

**** If the applicant fails any phase of the test,
the entire road test will be terminated at that point.**

REMARKS: The unit License Examiner will establish a standard driver test course, which includes the required tasks from AR 600-55, Appendix G.

The purpose of the road test is to evaluate the driver's ability to drive safely in most on-the-road situations. It serves as a basis for issuing an operator's permit and provides for instructional reinforcement and counseling.

It is important that the driving instructor/examiner become completely familiar with the requirements of completing the DA Form 6125-R.

Before conducting road test activities, consider the recommendations and required resources listed below.

Final evaluations will be recorded on DA Form 348.

Ensure Instructors and Examiners meet the requirements of AR 600-55, Appendix F and the TXARNG Drivers Licensing and Dispatching SOP.

The licensing Instructors and Examiners will closely study AR 600-55, Appendix G.

Determine a road-testing course, which meets the requirements of AR 600-55, Appendix G. Create a map overlay(s) of the driver's course, highlighting the required features along the route.

Sample DA 6125-R on page 85 and 86. For the purposes of demonstration this example has been typed, but LE scoring test will be filling these out by hand during the road test.

RESOURCES:

DA FORM 6125-R.

The equipment to be licensed on.

The appropriate -10 Operator's Manual and -12 Lubrication Order, if applicable.

All Basic Issue Items (BII), Accessory Kits, and system components (radios, weapons...) associated with the equipment.

Equipment Logbook

DA Form 5988-E, Equipment Maintenance Inspection Worksheet

Lubricants and Antifreeze (if applicable)

Rags

Pencil

ROAD TEST SCORE SHEET For use of this form, see AR 600-55; the proponent agency is DCS, G3/5/7.				DATE 20230927

TAB L:
COMPLETION OF DA FORM 348

LICENSING STEP 11

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
AR 600-55, Chapter 4

TASK: All training for vehicles and equipment which require licensing under this SOP/AR will be documented on the Qualification Profile in the GCSS-Army computer system prior to printing an updated Operator's Permit Record, DA Form 5984-E. The Qualification Profile provides a means for recording the complete history of an individual's qualifications and previous driving and equipment operating experience. The form will be maintained on every person who operates a vehicle or equipment owned or leased by the U.S. Army. Maintain a "hard copy" file of individual training/licensing records at the unit, IAW Appendix G, for all unit soldiers who operate a vehicle or piece of equipment owned or leased by the U.S. Army.

CONDITION: Given a Qualification Profile and the unit licensing documentation binder.

STANDARD: DA Form 348 is a permanent record and will not be destroyed or remade. Reproductions of DA Form 348 is not authorized for official purposes. The Qualification Profile will be maintained by the official responsible for vehicle and equipment operation. Sample DA Form 348 on page 92 and 93

EQUIPMENT OPERATOR'S QUALIFICATION RECORD (EXCEPT AIRCRAFT)

For use of this form, see AR 600-55; the proponent agency is DCS, G3/5/7.

NAME (Last, first, initial) Smith Adam J				PERMIT (Initial)	
				NUMBER 1234	DATE ISSUED 20231030
				TYPE ARMY STANDARD	LIMITATIONS (Physical or operational) N/A
SEX M	DATE OF BIRTH 25 November 1989	COLOR HAIR Brown	COLOR EYES Brown	HEIGHT 71"	WEIGHT 185

TAB M:
INDIVIDUAL RECORDS

LICENSING STEP 12

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP,
AR 600-55

TASK: Maintain required "**hard copy**" documentation for your Individual Licensing Records, i.e., DA 348, DA 6125, interview, etc.

CONDITION: Given Unit Licensing Records Binder.

STANDARD: Required documents are filed in the unit's soldier License files.
Documents which will be filed include copies of:

Mandatory:

- Commander's Interview from current organization
- Photocopy of civilian driver's license
- Manual DA Form 348, and DA Form 348-1 when required
- OF 346 or DA 5984-E (permit) if applicable
- Equipment Specific Training
- Course exams/tests for Phase I and II scores/results
- NVD Exam/test
- NVD Road Performance Test; recertify every 12 months (ARNG)
- NVD Certificate or Memorandum For Record
- DA Form 6125 Road Test Score Sheet
- Route Map used with DA 6125
- Tracked Vehicles: MFR stating satisfactory performance of training outlining appropriate road course taken

If Applicable:

- HAZMAT written test scores/results
- Ammunition Training Certificates

REMARKS: The intent is that upon completion of training, the individual's driver's training packet will be reviewed, updated, and will include all pertinent paperwork.

A Drivers' Pledge or SOU for DWI is not mandatory as that will be handled by the Police / Civilian Criminal Courts. Ignorance of the law (or regulations) is not a Defense, therefore the document itself is not needed as a pre-requirement for any sort of punishment.

TAB N:
ISSUE THE OPERATOR'S PERMIT

LICENSING STEP 13

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
AR 600-55
GCSS-ARMY End User Manual

TASK: Issue Operator's Permit, DA FORM 5984-E (Operator's Permit Record)

CONDITION: License personnel with completed application and training documentation (Steps 1-13) complete.

STANDARD: Issue the Operator's Permit IAW AR 600-55 and TXARNG Drivers Licensing and Dispatching SOP.

REMARKS:

The qualifying official, the master driver, is the final validation certifying that the license instructors conducted training to standard, and that the license examiner issued the necessary written test and performance road test to standard. The qualifying official's signature on the DA 5984 -E or the OF 346 verifies that the proper training has been accurately annotated on the individual's DA Form 348 and that the individual has been qualified on the equipment through written and performance testing.

GCSS-Army produced DA Form 5984 – E operator permits do not require an additional stamp over the title. The OF 346 will be stamped or marked legibly on the front with the words, ARMY STANDARD, ARMY LEARNER, ARMY INCIDENTAL, or ARMY LIMITED, to denote the type of permit issued. This stamp will be placed over the title of the form so that it does not interfere with the information contained in the blocks. The information can be typed or written but must be in black ink. Codes used on the OF 346 are the same as those used for DA Form 348.

TAB O:

BIANNUAL RECORDS REVIEW AND BIENNIAL CHECK RIDE

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
AR 600-55, Chapter 4

TASK: Conduct and document annual records review and two-year refresher Driving test.

CONDITION: Given the Operators individual drivers training folder and supporting documentation, DA Form 6125-R, Road Test Score Sheet and DA Form 348.

STANDARD: Unit LI/LEs and First Line Leaders/ supervisors qualified and licensed to operate the equipment/vehicle, will conduct biennial (once in every two-year period) check rides for each driver. The two-year refresher driving test will assess driver proficiency, identify weaknesses, and help improve unit driving training program. Completion of sustainment training will be annotated on DA Form 348.

REMARKS: Every operator's individual Licensing/Driving record will be reviewed biannually by the Unit LI/LE. The review will identify:

- Safety and driving awards earned
- Expiration of permits
- Accidents, violations, or license suspension (civil or mil)

Sustainment training is periodic driver training conducted to maintain a high level of driver skill proficiency and to prevent drivers from acquiring poor habits. This road test will be completed in a vehicle endorsed on the soldier's license. A DA Form 6125-R will be used to grade/record the 2-year check ride driving test and will be filed in the Soldier's driver's training folder.

TAB P:

HAZARDOUS MATERIAL (HAZMAT) HANDLING

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP

AR 385-10, Ch. 2
AR 600-55, Ch. 4
NGR 385-64, Ch. 4
CFR 49
TC 21-305-20
FM 55-30
TM 9-1300-206

TASK: Conduct Hazardous Material training and licensing IAW AR 600-55, Para 4-9(b).

CONDITION: Given AR 600-55 and appropriate extracted CFR Title 49, Part 171.

STANDARD: Training in transporting hazardous materials will be consistent with Part 171, Title 49, Code of Federal Regulations.

- a. Definitions
- b. Placards
- c. Loading and unloading
- d. Regulations
- e. Emergency equipment
- f. Forms and records
- g. Blocking and bracing
- h. Emergency response procedures
- i. Vehicle parking rules
- j. Route selection
- k. Host nation requirements (if applicable)

REMARKS: This training will be annotated on the DA Form 348 using the user made Equipment Identification Code (EIC).

Drivers who will transport/handle ammunition must have specific training per NGR 385-64 Table 4-2 (ARNG)

TAB R:

NIGHT VISION DEVICES DRIVER TRAINING

REFERENCES: TXARNG Drivers Licensing and Dispatching SOP
AR 600-55, Chapter 8 (Night Vision Devices)
TC 21-305-2, Night Vision Goggles
TC 21-305-7, Training Program for Light Vehicles

TASK: Conduct training and licensing documentation for night driving using a Night Vision Device (NVD). Drive vehicle during night conditions.

CONDITION: Given instruction, DA Form 5988-E/2404, DD Form 1970/5987/E, pencil, appropriate vehicle operator's manual, equipment records folder, rags, lubricants, coolant, improved road surfaces, appropriate night vision device (NVD) and wheeled vehicle with BII.

STANDARD: Without accident or injury, drive the designated route at night while employing vehicle black-out drive capability; use defensive driving methods. Up-shift and downshift the transmission, manipulate the controls, use correct braking procedures, and perform basic driving maneuvers.

REMARKS: Special emphasis must be given during safety briefings prior to night driving.

This training will be annotated on the operators DA Form 348 using a user made Equipment Identification Code for PVS- night vision.

DISPATCHING CHECKLIST

DISPATCHING CHECKLIST			DATE:
UNIT	EQUIPMENT		QA/QC: Circle Final Approval
LOCATION:	MODEL:	SAT UNSAT	
POC:	NOUN:	Operator: Rank Last, First Name	
UIC:	ADMIN #:		
UNIT NAME:	SERIAL#:	Operator Signature:	
INITIAL in YES or NO Block			
DISPATCHER VALIDATES	YES	NO	REMARKS/COMMENTS
Received request to dispatch equipment			
Operator & Assistant have a valid License			
Operator & Assistant are Qualified for Equipment			
Operator & Assistant drivers are Registered in GCSS-A and:			
have a Valid DA Form 5984-E/OF346			
have a Valid State Driver License			
Risk Management Worksheet completed			
Are services due on Equipment?			
Issued TM-10 for the equipment			
Issued DA 5988-E and local PMCS checklist			
All new equipment faults found are reported to Maintenance			
Is Equipment Fully Mission Capable (FMC)?			
Does Equipment have any Admin Deadlines?			
If equipment requires a Circle X, has Commander Approved it?			
Is this a Remote Dispatch? (Enter Location in Remarks)			
Issued an Automated Dispatch in GCSS-A (Preferred) w/CDR Representative approval			
Issued a Manual Dispatch (DD Form 1970)			
Log Equip in & out (GCSS-A or DA Form 2401 for manual procedures)			
Issued all required BII for equipment (SEE TM-10)			
Issued a complete Equipment Record Folder:			
DA Form 5988-E, Equipment Dispatch, Two SF Forms 91, Two DD Forms 518			

Issued all keys			
H-22			
	INITIAL in YES or NO Block		
OPERATOR PROCEDURES	YES	NO	
Used local PMCS checklist for equipment			
PMCS completed (Before, During, After) IAW TM-10 & new faults annotated on DA Form 5988-E			
Performed Operator-level Repairs			
All BII is inventoried & secured in equipment			
Supervisor (Print Rank, Last, First Name):			
Signature:		Date:	
I certify this dispatch is authorized and the information above is accurate			
CO / XO / 1SG Print Name and Signature:			
DISPATCHER CLOSE-OUT PROCEDURES	YES	NO	REMARKS/COMMENTS
Updated Mileage/Hours/Fuel/Oil upon return			
All new faults are annotated on DA 5988-E			
Vehicle Secured and Combat parked			
Dispatch Closed out in GCSS-Army
